RE: 4-Way Stop Request

Dear Mr. Gast,

Enclosed is a copy of the City of Fargo Stop/ Yield Criteria.

Based on our analysis, the 4-way stop requested at 39th Street and 34th Avenue South does not meet the criteria for installation. 39th Street is classified as a collector and 34th Avenue South is a local street. 4-way stops are installed at locations where there is close to a balanced flow with a ratio of 60:40 or better. Omitting the westbound right turn volume, this intersection has a ratio of 75:25. Also there are no significant issues with the sight distance at this intersection.

Sincerely,

Jason Baker
