Fargo, North Dakota 58102
Phone (701) 241-1310
Fax (701) 476-4136

To the Citizens of Fargo and the Fargo City Commissioners:

The preliminary budget for 2016 is being presented for your review and consideration. I want to thank the Budget Team, Commissioners and Department and Division Heads who worked hard on this budget with good insight and recommendations. We tried new methods on this budget and will continue to refine our process. Many factors go into a budget and I think we considered all requests thoughtfully. Please look over the budget and see the opportunities and changes we have made.

SUMMARY

The City of Fargo is continuing to grow, with many challenges and opportunities. We are growing at a faster rate than predicted and we need to work closely with our Department Heads to take care of our citizens. The normal operations of the City could be managed with our growth but we have to look at flood control and strong infrastructure. As we become more urbanized, the people are demanding more services from Police, Fire and Public Works. The total General Fund budget is \$94.1 million which is up 4.7% from last year. Although personnel requests and operational expenditures are up, capital requests were reduced by 22%. We have worked hard to have a balanced budget.

PERMANENT FLOOD PROTECTION

Permanent flood protection continues to be a key initiative. We have set the table for local and state support for the project and need to continue to push for federal funding. It is important to have a plan with a timetable, since FEMA will remap again in 5 years. All of us need to work together to move forward on this project for the prosperity of the community. Protection is essential and we will need to move forward on a projected timeline as well as having open communications so we move forward in a transparent fashion.

CITY HALL AND PARKING

With the growth of the City and the services we provide it is time to build a new City Hall. City services are hard to provide with a structure that was built 55 years ago. Think of all the changes that have happened since then. People want quick, efficient services with modern technology. We are a City that continues to win awards for being forward thinking and innovative. A new City Hall will help to spur downtown development with a larger tax base that can help to cover our revenue issues in the future. We have a design to make it more user friendly and help our citizens in any transactions they have with the City. Our consumers expect excellent service and competency. In addition, there are needs for parking in our urban area so people can enjoy their time and not be concerned about a parking ticket. Finances are in place to handle this challenge and we need to move forward. People will be very pleased with the result of a well thought out City Hall.

CAPITAL INVESTMENT

We reviewed many capital requests and were able to fund 78% of departmental requests. We reviewed our current replacement practices for vehicles and heavy equipment in our fleet as well as the frequency of replacing technology infrastructure. Extending the useful lives of our equipment will help us save money. We continue to fund essential street maintenance projects as a high priority in the capital budget, as well as the capital equipment for departmental operations. While capital funding was reduced in the 2016 budget the City Commission did approve supplemental appropriations in 2014 in the amount of \$1 million.

We have just finished the Health Building with a Police station in the center of the City. At the same time, we need to refurbish Fire Station #1 to help serve the community. We are excited about the changes and think people will be pleased with the results. We have to figure out what to do with the Civic Center as an Events Center to get the most out of its presence in our community. I have many fond memories of events in the Civic Center and we need to repurpose it for the future. We will look at a Capital Improvement Plan so we can budget our capital needs for the next 10 years. It will be similar to the water plans for the future. Our infrastructure will need continued funding.

BUDGETED RESOURCES

A total of 17 new positions are recommended in the budget for 2016. There were many more requests which were not funded at this time. We continue to expand Police and Fire to handle the increased needs and calls throughout the City. With increased staffing in the Police Department, we will continue to manage increased drug and gang activity in the City.

A cost of living wage adjustment was approved effective July 1, 2015 and we may need to make a future adjustment on January 1, 2016 if the economy heats up. Health insurance premiums have jumped 15% and had to be addressed. We continue to monitor the Affordable Care Act so we follow all the rules.

PROPERTY TAX AND FEE CHANGES

I am recommending that the mill levy drop 2.25 mills to a level of 55.00 mills. With the help from the State of North Dakota and the changes in the mill levies of the County and the Park District, people should see a reduction in their taxes. The County has benefited by legislative changes and has some revenue we do not have access to. We have some liabilities going forward that we have to be aware of and want to have a margin if needed. We have a strong commercial base (51%) that helps us with our property tax.

We do not recommend any fee changes but we need to monitor that. We will look at this closely because of increasing costs of lighting, Forestry and water. We will benefit from our water agreement with West Fargo. We need to continue to look at ways of working with our neighbors on mutually beneficial arrangements.

Parking and transit continue to grow and we need to look at opportunities to capture some revenue. We have changed our parking management and are pleased with the results.

MID-YEAR BUDGET CHANGES

Last year we benefited from positive revenue and decreased expenses. We will continue to look for opportunities and set priorities in our budget adjustments. State revenue is doing better than expected in some areas but other areas are lagging.

COMMUNITY OUTLOOK

Fargo continues to prosper, with good jobs and wage growth, along with continued increase in our population. There has been a significant expansion of our regional health care facilities which will continue to provide top quality services not only to our citizenry, but many from other areas. A recent population growth projection was completed and it was reported that our growth rate is accelerating over past years. City leaders strive to provide excellent municipal services to assure that all of our City needs are being met.

Flood control continues to be one of our highest priorities for our community. We are investing in flood control infrastructure with the help of the State of North Dakota and are working diligently on the FM Diversion project which could gain final approve in late 2016 or 2017. Permanent and sustainable flood control will make our local economy continue to flourish and expand. The quality of life in Fargo is remarkable and our citizens have great opportunity to enjoy the many amenities that we offer, along with good quality jobs, education, health care and recreation.

CLOSING COMMENTS

In closing, I look forward to further discussion on the budget and final completion in September and would like to thank all who have actively participated in this process.

Sincerely,

Timothy J. Mahoney
Mayor

Subsequent Commission Action - 9/28/2015

The City Commission conducted a public hearing and approved the 2016 preliminary budget as the final budget.

Fargo Mayor and Commissioners

Mayor Tim Mahoney

Elected: 2005, 2006, 2010, 2014, 2015

Major Fund Descriptions:

General Fund:

The General Fund accounts for all financial resources not allocated to other funds. Majority of revenues derived from State Intergovernmental revenues, property taxes, and charges for services.

Improvement Bond Fund:

This fund accounts for all refunding improvement bond funds required by bond covenants from individual Refunding Improvement Bond issues. It accounts for all special assessments levied for the payment of bonded indebtedness.

Sales Tax Bonds Fund:

The Sales Tax Bond Fund accounts for all resources and related debt payments associated with sales tax revenue bonds. This fund is structured to comply with various bond covenants associated with individual sales tax backed debt issues. Sales tax resources are voter approved and have been authorized for a twenty year period.

Water Fund:

This fund accounts for the activities (revenues, operating and capital expenses) of the City's water system. The City receives user fee revenues derived from sale of water and other related services to the general public.

Major Revenue Sources Review and Discussion

The Government Finance Officers Association (GFOA) best budget practices guidance recommends a discussion of major revenue source as an integral part of the budget document. A discussion of each major revenue source is provided to assist budget users in understanding where our funding is derived and how it is predicted in the annual budget process. The revenue categories are listed in order by the amount from largest to smallest and this discussion covers 70% of City-wide revenues.

Sales Taxes

Sales taxes have been voter approved and are managed in accordance with the City's Home Rule Charter sections 3(S), (T) and (U). All sales tax collected are dedicated by Charter for infrastructure projects and financing. Section 3(T) is dedicated for exclusive use on flood risk mitigation projects while section 3(S) and (U) have a broader definition of infrastructure. The combined sales tax rate levied by the City of Fargo is 2%. The State of North Dakota currently levies 5% sales and use tax and Cass County collects another .5%. All collections are administered by the State Tax Commission's Office under contract with the City. Collections are remitted monthly as collected by the State. The City uses historical trending and a local economic assessment process in projecting future sales tax revenues. The City uses the same sales tax exemptions methodology as deployed by the State of North Dakota. We are forecasting collections of \$52 million in 2016 and a continuation of consistent growth in the future due to the strength of our overall economic conditions. A 3.5% growth assumption has been applied to the sales tax revenue forecast based upon past practices and monitoring of our long term collection trends.

All sales tax resources are dedicated for infrastructure funding. A portion of our sales tax revenue is pledged to long term debt repayment for projects already constructed. Of the total expected sales tax collection of \$52 million, \$26.1 million is budgeted in the debt service funds and the remaining amount of \$25.9 is allocated to the capital project fund which is not budgeted as required by NDCC 40-40.

Public Utility Fees

Utility Fees

The City provides municipal utilities including water, wastewater, solid waste, storm sewer, street lighting, vector control and forestry services. All fees are established by resolution of the City Commission and are set at levels to sustain our utility services. We anticipate collecting about \$51.4 million in public utility fees in 2016, up from \$47.4 in 2015. There are no rate increases anticipated for 2016. A primary driver of increased revenues relates to Fargo becoming water service provider to the City of West Fargo which was approved in July, 2015.

Budgeting methodology for public utility fees include historical analysis of growth and demand for new services as new subdivisions develop. The City is a regional water service provider to Cass Rural Water Users District that operates in our southern areas as well as providing wastewater services to smaller cities adjacent to Fargo.

We are also cognizant of what other cities charge for these utility services and participate in a rate study each year that compares several rate structures in different cities in the region as well as using innovative methods to keep our rates as low as possible. Long term master planning for both operational and capital planning is updated annually. Sales tax resources are used to fund expensive infrastructure which allows us to keep utility rates stable.

Fargo has been a leader in innovation by leveraging our utility operations to maximum benefit. Innovative projects include capturing and selling methane gas from our municipal landfill, converting methane gas to electricity and selling to an electric distribution cooperative. We are also recycling wastewater discharge for sale to an ethanol production facility. All of these initiatives are producing additional revenue as byproducts of our traditional utility operations.

Byproduct Revenues

Fargo has been a leader in innovation by leveraging our utility operations to maximum benefit. Innovative projects include converting methane gas from our landfill to electricity, selling surplus methane gas to a local business, and reusing wastewater for ethanol production. All of these initiatives are producing additional revenue as byproducts of our traditional utility operations. Long term agreements are in place and these operations continued to be a mutual benefit to our citizens and private partners. A total of \$1.19 million is being budgeted for 2016.

Special Assessments

Special assessments are a widely used method of funding infrastructure projects in North Dakota.

Those who benefit from infrastructure projects help pay for these improvements. Special assessment benefit districts are established during the project planning phase and final project costs are allocated to property parcels after the projects are completed. Assessments are accounted for on a project specific basis and therefore we are able to predict our certified assessment revenues with a high degree of certainty. Generally, they are collected over a 25 year period. A property owner may choose to prepay their entire assessment and funds accumulated are restricted within debt service funds for the payment of long term debt.

The amount budgeted in 2016 of \$26.4 million is based upon projects currently on the assessment rolls and an allowance for assessment prepayments. This revenue source will rise as our community growth continues. Funds collected plus prepayment accumulations are sufficient to cover our debt service requirements.

Property Taxes

Property taxes provide about 24% of our overall General Fund revenues. The City's Home Rule Charter contains a tax mill cap of 64 mills. The 2016 preliminary budget recommends a tax mill reduction of two mills. The proposed mill rate of 55.0 leaves unused taxing capacity of 9.00 mills. Tax collections are based upon the mill levy established by the Board of City

Commissioners which is evaluated as part of our overall revenues during the annual budget process. Tax collections are estimated based upon the final property tax rolls and are collected by Cass County and remitted to the City as they become due. We are projecting total property tax collections of \$26.5 million for next year which is an increase of 7.6%.

Tax mills were reduced in the 2014 budget by one mill and this year's budget will contain a reduction of two more mills.

Intergovernmental Revenues

Intergovernmental revenues come directly from other governmental units. Funding is received from federal, state and local agencies. Revenues are commonly received in the form of grants for specific purposes or may be more general in nature.

Intergovernmental revenues have been increasing as a percentage of our overall revenue base in the past few years due to rapidly increasing state resources during a time when federal revenues are declining. About 30% of our General Fund revenues come from intergovernmental sources. The largest single State intergovernmental revenue source is from state aid that is derived from statewide sales tax collections. Overall increase in State intergovernmental resources budgeted for 2016 is 5.3%. Growth in intergovernmental revenues in governmental funds is shown in the following chart.

The City budgets for grant revenue based upon approved grant agreements. Budgets are modified during the year as new grants are awarded and approved by the Board of City Commissioners. State intergovernmental revenues are estimated based upon financial statistics reported by the State of North Dakota or other entities, historical trending and an assessment of the statewide economy. We do not use an external economist to predict State revenues sources; however, our existing budget process contains a mid-year revenue revision if needed. State intergovernmental revenues were adjusted down slightly due to a decline of actual collection levels experienced during the first six month of 2015.

Charge for Services

Building Permits

The City charges a variety of fees associated with the delivery of services to our citizens. Building permits are one of the most prominent of our fees. They are an important indicator of our economic strength and the level of construction activity in our local economy. Fees are established by the City Commission and are updated periodically.

Fargo set an all time record level of building activity in 2014 with permit values exceeding \$ 1 billion. Significant expansions are occurring in our health services sector with Sanford and Essentia Hospitals building more or expanded capacity to meet the needs of the region. The 2016 budget anticipates a continued strong demand for housing and we are using revenue projections commensurate with years preceding 2014 due to the surge in permits related to large projects experienced in 2014.

Capital Project Engineering and Engineering Fees

Engineering and administrative fees are charged for the management and delivery of capital projects. These fees are part of our base revenues associated with the design, development, construction and administration of a robust infrastructure deployment program. The table below shows the trend of this revenue source.

The trend for all charge for services revenue accounts is shown in the following graph. We anticipate overall revenue levels to be similar to the 2015 budgeted levels.

Fund Description	Fiscal Trends
<p>The General Fund accounts for all revenues and expenditures of the City of Fargo which are not accounted for in other funds and is the largest and most important operating fund.</p> <p>Our revenue sources include a diverse blend of taxes, licenses & permits, intergovernmental revenues, charges for services, fines and forfeits, interest and other revenues.</p> <p>Major functional programs include General Governmental Services, Public Safety, Public Works, Public Health and Welfare, Recreation & Culture, Public Transportation, General Support, and Capital Outlay.</p>	<ul style="list-style-type: none"> • Property tax values continue to increase as a result of a high level of residential and commercial construction. • State revenue continues to increase, however the rate of growth is slowing. We anticipate future growth to continue in this revenue source. • Construction activity and building permit revenues remain strong after a record setting 2014. • There are consistent demands upon our allocable resources for items related to growth such as municipal facilities, staffing and operational costs. • Budget strategy is focused on maintenance of fund balances and allocation of resources at levels to sustain our operations. • Largest increases in budget authority are for Public Safety, Public Works, and Debt Service transfers due to the continued growth of the City. • We are planning to build a new City Hall in 2016 / 2017. • General Fund balance goals will be maintained in accordance with our fund balance policies.

Summary of Last Ten Fiscal Years

Fiscal Year	Original Budget	Revised Budget	Final Results	Variance	Variance %
2014	\$ 75.9	\$ 78.8	\$ 83.2	\$ 4.4	5.6%
2013	70.5	79.5	79.9	0.4	0.5%
2012	66.0	71.0	72.4	1.4	2.0%
2011	60.3	67.4	73.1	5.7	8.5%
2010	58.9	62.8	66.8	4.0	6.4%
2009	56.2	62.6	63.5	0.9	1.4%
2008	52.1	56.1	58.7	2.6	4.6%
2007	48.1	52.9	51.6	(1.3)	-2.5%
2006	49.7	51.6	49.7	(1.9)	-3.7%
2005	43.8	47.1	48.0	0.9	1.9%
Ten Year	\$ 581.5	\$ 629.8	\$ 646.9	\$ 17.1	2.5%

Analysis Notes:

Larger variances shown in 2010 and 2011 are a result of rapidly increasing State intergovernmental revenues derived from a very strong North Dakota economy which were unprecedented and very difficult to predict.

Larger variance shown in 2014 was the result of a record year for building permits issued. The total value of building permits issued was \$1.012 billion which is an all time record for the City. There was also a large increase in charges for services due to a large volume and demand for infrastructure in new housing developments.

Data has been extracted from audited financial statements which are posted online @ www.cityoffargo.com

Description of Service Provided	Current or Emerging Issues
<p>The City Administrator is the lead staff person responsible for policy and overall operations of the City and is the primary liaison between Departments and the City Commission. The City Administrator is an appointed position. Services include providing leadership, direction and ongoing support for City operations in addition to representation on several other Agencies or Authorities including:</p> <p>External Agencies</p> <p>FM Diversion Authority Lake Agassiz Water Authority North Dakota Water Coalition Fargodome Building Committee Metropolitan Council of Governments Red River Valley Dispatch Center Local Governmental & Educational Units State Legislature</p> <p>Internal Activities & Committees</p> <p>Budget Team, Public Works Evaluation, Personnel Evaluation, Utilities, CDBG, Building Authority, Emergency Management, Chair of Mayor's Cabinet, and other ad hoc committees assigned by the Mayor and City Commissioners.</p>	<p>After 37 years with the City of Fargo, Pat Zavoral announced his retirement in July of 2015. Mr. Zavoral has had a remarkable career with the City and he will be extremely difficult to replace in light of his vast institutional knowledge, vision, and leadership skills.</p> <p>Assistant City Administrator, Bruce Grubb, has proposed a reorganization of the City Administrator's Office to retain the assistant position as a new FTE in 2016. It is further suggested that the day-to-day departmental administrative duties be shared between the City Administrator and Assistant City Administrator through departmental liaison assignments.</p> <p>Ongoing issues in 2016 include the following:</p> <p>FM Diversion In-City Flood Protection Red River Valley Water Supply Project Central Fire Station Project New City Hall Civic Center Renovation Downtown Parking Ramp(s) Downtown Redevelopment Water Plant Expansion Wastewater Plant Expansion New Solid Waste Landfill Regionalization of Services Public Safety Staffing Fargodome Management Contract Southside Area Planning Etc.</p>

Description of Service Provided	Current or Emerging Issues
<p>The Human Resources Department is responsible for the direction of all human resource programs including the following:</p> <ul style="list-style-type: none"> • Recruiting and Promotional Processes • New Employee Orientation • Compensation • Job Classification • Job Descriptions • Benefit Administration • Policy Development • Performance Management • Employee Relations • Safety and WSI Administration • Training and Development • Compliance with Federal, state and local laws and regulations. 	<ul style="list-style-type: none"> • Benefit and Leave Administration Based on pension eligibility projections, increased Affordable Care Act (ACA) Compliance requirements and the workload associate with leave of absences, the need for a Benefit and Leave Coordinator has become more evident. The development of a coordinator role would allow the HR Generalists to work more closely with their primary departments on employee engagement, employee relations, recruitment, performance management and succession planning. • Training & Development A critical need exists to formalize a training program for new and current employees, as well as supervisors in order to develop and maintain a well trained, highly skilled workforce and ensure compliance with state and federal law. • Job Application System The current job application system does not allow for comprehensive upgrades without rebuilding the system entirely. In consultation with an IS Manager, it has been determined the most efficient and effective path forward would be to purchase a system from a vendor.

<p>The Communications Manager manages external communications for the City of Fargo and assists with internal communications.</p> <p>Major services delivered include:</p> <ul style="list-style-type: none"> • media relations • promotions • city website • Mobile app • social media • web and social media related policies • publications • operation of public and government access television channels • creation of educational videos 	<ul style="list-style-type: none"> • The new city website is currently under construction and will be live in 2016. The transfer of content to the new site will begin in the coming months. The new site will include new features such as: <ul style="list-style-type: none"> ○ Language translation ○ Adjustable font sizes ○ Intuitive information architecture • We have contracted with PublicStuff for a mobile citizen reporting app. This app will integrate with City Works which is currently being tested internally by Public Works and Engineering. The service will also be available via desktop computers. The app will be launched publicly in September. • The need for graphic design assistance for logo creation, web graphics, print ads, and inserts into departmental reports and presentations continues to grow. An annual budget of \$12,000 was requested starting in 2016 to help fulfill this need. • A rising interest in internet TV is emerging. This option allows users to watch movies and some television channels on their TV, via the internet, without the expense of a monthly cable or satellite TV subscription. We are following this trend to determine if it would be of value to stream the city cable access channels on internet TV.

Description of Service Provided	Current or Emerging Issues
<p>The City of Fargo constructed a 4,500 seat baseball stadium located on the campus of North Dakota State University (NDSU). It is home the FM-Redhawks baseball team, a member of the Northern League.</p> <p>The stadium is also leased to North Dakota State University for use by their college baseball program.</p> <p>The original cost of the stadium was \$5.2 million and this cost has been recovered by stadium suite rentals pursuant to a lease agreement with Fargo Baseball, LLC.</p> <p>This recreational and entertainment facility continues to provide top quality events for our citizens to enjoy during the summer season.</p>	<p>All stadium financial activity has been reclassified into the General Fund for the 2016 budget since all of the original capital costs have been recovered. The remaining fund balance deficit will be recovered in future years from transfers from the General Fund. The amount of transfers will be determined in the annual budget development process.</p> <p>Maintenance costs are trending higher due to the age of the facility that was built in 1995. A more formalized capital maintenance plan will be assembled in 2016.</p> <p>Capital improvements have been made recently to expand the handicapped accessibility to the Stadium.</p> <p>Revenue sharing formulas were modified in 2014 pursuant to our lease agreements. Less revenue is now realized as a result of this change.</p>

Description of Service Provided	Current or Emerging Issues
<p>The Auditor's Office provides fiscal administration services in support of our governmental functions. It also provides services to the Red River Regional Dispatch Center and the FM Diversion Authority pursuant to fiscal services agreements.</p> <p>The major services delivered include:</p> <ul style="list-style-type: none"> • General Accounting and Payroll • Budgeting • Capital Financing & Debt Management • Comprehensive Annual Financial Report • Treasury Management • Insurance and Risk Management • Auditing and Financial Reporting • Special Assessments • City Utility Billing • Licenses & Permits • Records Management • Defined Benefit Pension Administration • Financial Policy Development 	<ul style="list-style-type: none"> • There is a trend toward alternative non-traditional payment methods. City offers interactive voice response, online web based, credit card payments, and traditional mail and window payments. Automated payment methods are increasing in volume. • The Federal Government has produced a new consolidated set of federal administrative regulations that will need to be reviewed and implemented in 2015 & 2016. This is referred to as the "Super Circular". • Significant effort is being expended on the fiscal services agreement for the FM Diversion project. City staffs are spending a larger share of their time on this activity. • Taxpayer transparency is becoming a bigger issue nationwide in the governmental sector. City will launch a web based financial portal that will allow users to view financial trend data for City operations.

Description of Service Provided	Current or Emerging Issues
<p>Class B misdemeanors are the only offenses under Fargo Municipal Code subject to imprisonment. These carry a maximum imprisonment penalty of 30 days.</p> <p>Most offenses do not carry a minimum mandatory imprisonment. Mandatory sentencing means the Judge does not have the choice to impose a lesser sentence.</p> <p>Offenses requiring mandatory minimum imprisonment include:</p> <ul style="list-style-type: none"> • Driving Under Suspension – suspension a result of a DUI requires 4 days imprisonment. • DUI – second offense within 7 years requires 10 days imprisonment. <p>Incarceration services are provided by Cass County and Centre Inc. The City funds these costs from General Fund appropriation based upon incarceration service agreements in place.</p> <p>Centre Inc. provides minimum security incarceration at a lesser cost to the City than traditional jail. Centre inmates are sometimes assessed court costs if there is an indication that the person has the ability to pay, which further reduces the cost to the City.</p> <p>In-home electronic monitoring is an additional option which is self pay by the defendant.</p>	<p>Current trends are to sentence first time offenders to incarceration at Centre or electronic monitoring. A majority of these include DUI and DUS sentences. Sentences served on electronic monitoring are generally of a short duration due to being self pay in advance.</p> <p>The majority of sentences served in the Cass County Jail are repeat offenders and those arrested on warrants for failing to comply with their sentences.</p> <p>Changes in DUS laws will result in fewer convictions and fewer sentences of incarceration.</p>

Operational Measures

Description	2014 Actual	2015 Expected	2016 Projected

Description of Service Provided	Current or Emerging Issues
<p>The City Assessor's Office is responsible for maintenance and circulation of all property ownership and legal description boundary information in the City of Fargo. The Assessor's Office also appraises the value of property in the city as well as administers all property tax exemptions.</p> <p>The major services delivered include:</p> <ul style="list-style-type: none"> • Assist the public in understanding and utilizing available tax exemptions. • Provide property tax and valuation estimates to developers, real estate professionals, and taxpayers. • Assist and coordinate valuation efforts of proposed projects for future development & private/public financing concerns. • Provide the legislature information on assessment valuation, procedure, and administration matters. • Provide projected valuation information to local taxing jurisdictions for budgeting and levying purposes. 	<ul style="list-style-type: none"> • Ongoing legislative concerns and actions relating to property tax levels, transparency, and administration continues to evolve. This has an impact on the conditions and requirements our department operates within to deliver services to the public. • Functional support is ongoing to assist in assuring expedient and equitable property acquisitions in City and Diversion flood protection efforts. • Staff turnover in the past couple years has produced an opportunity to evaluate some work processes creating positive, productive, and efficient outcomes. • The recent increase in market valuations of properties has been more significant than in the prior several years. This has increased the value appeal workload and the amount of valuation notices to some of the highest levels ever. In response, cross training and alternative work processes are constantly being brainstormed. Appraisal staff exposure to continuing educational offerings has also been increased.

Operational Measures

Description	2014 Actual	2015 Expected	2016 Projected
True & Full Property Valuation	\$9,144,332,000	\$10,818,566,700	\$11,946,935,000

<p>Buildings & Grounds is in charge of maintaining seven downtown structures, five “off-campus” facilities, a Public Safety Building, and the Fargo Cass Public Health facility.</p> <p>At these locations staff takes care of the HVAC systems, plumbing, electrical, and mechanical. In addition inspections, testing, and service for alarm systems, sprinkler systems, emergency generators, fire extinguishers, and elevators are provided.</p> <p>Buildings & Grounds employees oversee grounds keeping, sidewalks, and parking lots through the four seasons.</p> <p>Staff also assists one City Bus Terminal and seven Fire Stations with troubleshooting and consultations on maintenance related issues.</p> <p>Buildings & Grounds is available for consultation with all City Departments regarding maintenance, roofs, asbestos, indoor air quality concerns, recommended vendors, etc.</p>	<p>Construction has begun on the combined Public Health/Morgue/PD Substation, consisting of 60,000 sq. ft. in 2014. This is facility will be open and in use by September 1, 2015. Janitorial services for this large building were added into the 2016 budget.</p> <p>The new City Hall is in the planning stages, and will be 90,000 sq. ft. with an estimated construction during 2016 or 2017.</p> <p>This Division absorbed two full time employees previously funded by the Civic Center as a result of decommissioning of part of the Civic Memorial Auditorium in anticipation of City Hall construction.</p> <p>Newer facilities are moving toward:</p> <ul style="list-style-type: none"> • Rapidly changing electrical upgrades (LED’s, Ballasts, Auto Switches) resulting in higher initial costs but provide long life, low maintenance, and very high energy efficiency. • Compact, energy efficient boilers & updated chiller systems. • Computerized HVAC monitoring systems.

Description of Service Provided	Current or Emerging Issues
<p>Land Use Planning - Responsibilities include comprehensive planning, growth plans, park plans, and special plans, studies, and regulations.</p> <p>Development Review – Responsibilities include review of applications for text amendments, map amendments, conditional use permits, variances, alternative access plans, and other applications provided for in the Land Development Code (LDC). Site plan reviews are done to check for compliance with the Land Development Code.</p> <p>Land Development Code Administration – Responsibilities include providing information on regulations and procedures to developers, builders, and property owners, and enforcement of the code.</p> <p>Community Development Planning – This includes the development of community development plans, housing plans, and neighborhood plans.</p> <p>Community Development Program Administration – This is the administration and implementation of housing and community development programs funded by HUD programs.</p> <p>Downtown Development and Redevelopment – Responsibilities consist of planning for and encouraging redevelopment. Programs include the Renaissance Zone program, storefront rehab/downtown projects, tax increment financing, and PILOT incentives.</p> <p>Parking – This is the planning and management of the downtown parking system, including parking ramps, the Ground Transportation Center, and surface lots.</p> <p>Special Commissions & Boards – Staff support is provided to the Planning Commission, Community Development Committee, Historic Preservation Commission, Human Relations Commission, Native American Commission, Arts and Culture Commission, Fargo Youth Initiative, efargo and other special task forces.</p>	<ul style="list-style-type: none"> • The growth of Fargo will require annexations, land use plans, and utility extensions to allow for future growth in the city. • The larger number of requests for development review may cause delays in their review. The volume of requests also delays land use planning and special studies. • Redevelopment and infill projects continue to gain interest as land value increases and availability of green fields decreases. • There is a greater interest in neighborhood planning from older neighborhoods. • Decreasing federal resources makes it more difficult to address community development and housing needs. • There is a growing interest in new buildings in downtown, as many underutilized buildings have been redeveloped. This will require more parking. • All downtown parking facilities are at capacity, and parking will be lost because of the floodwall project. New buildings downtown are being built on surface parking lots, further removing surface parking spaces.

Description of Service Provided	Current or Emerging Issues
<p>The Inspections Division provides code enforcement services through review of building plans and the issuance of permits of various types for construction approval. Types of permits issued include building construction, energy, electrical, plumbing, HVAC, and signs. This is a law enforcement function of the City.</p> <p>Services provided:</p> <ul style="list-style-type: none"> • Review of construction plans • Permit issuance • Construction inspections • Inspections of existing buildings – residential rentals • Inspections for junk and junked vehicle complaints • Interpretations of code requirements • Day care inspections • Complaint response • Zoning Inspections • Certificate of Occupancy issuance • Records retention 	<p>An all-pervasive issue is the scope, diversity, and number of building projects coming into the community as well as the need to maintain the resources to provide the expected service in a manner that satisfies demand effectively and assures the continued safety of our built community. Increasing geographic distance adds to the complexity of providing inspections in the timely and thorough manner to which our customers and citizens are accustomed.</p> <p>Another current issue is maintenance of the city's stock of existing buildings through enforcement of its minimum standards.</p> <p>An increasing reliance on digital records requires more connectivity on the parts of our inspectors. New software allows customers to submit inspection requests on-line but more-flexible digital tools will be needed to offer the utility in permitting and payment that the public is coming to expect.</p> <p>The area south of Interstate 94 and west of 45th Street will continue to develop rapidly with a wide variety of hotel, apartment, retail, and service industry projects intended to serve both the new hospital and the large amount of residential development in the southern end of the city.</p>

Description of Service Provided	Current or Emerging Issues
<p>Transit provides transportation services on the fixed route bus system and the complementary paratransit system (service for people with disabilities unable to navigate the fixed route system). Transit works closely with the Central Garage Department for inventory control, technicians, building maintenance, and bus washers; the Finance Department assists with grant management; the IS Department has been a critical resource. Overall, Transit's responsibilities fall into the following categories:</p> <ul style="list-style-type: none"> • Provide safe, efficient mass transportation within the community. • Fiscally responsible management of local, state and federal funding. • Market the Transit system to attract choice riders and still serve needs of transit dependent. • Develop and maintain relationships with partners. • Demonstrate the technical capacity to provide grants administration and fiscal cash management. • Participate in program management and coordinated plans within the region and at the state levels. • Ensure adequate oversight of contractors and lessees. • Work closely with Maintenance to ensure proper oversight of federally funded assets. • Develop programs and guidelines to ensure compliance with ADA and Civil Rights (i.e. Title VI and DBE). • Procurement to ensure all local, state and federal requirements and certifications are met. • Satisfactory continuing control of all Transit assets. • Ensure public comment processes are followed for service and fare changes, Transit Plans and projects. • Ensure the federal criteria are met for fare structures. • Ensure there is an element of Safety and Security to the local Transit system. • Develop, adopt and implement a Drug & Alcohol Policy which meets Federal Transit Requirements. This includes being responsible for the program and oversight of any contractors and lessees. 	<ul style="list-style-type: none"> • The prevalent concern is the lack of adequate administrative staffing to entirely address the growing needs of the Transit system. Existing staff have achieved a measure of success, however, additional staffing would foster a healthy growth of the Transit system and a more proactive approach. The administrative staff has not increased since 2008 when the Mobility Manager position was moved from a half time position to a full time position. • Capital investments are struggling to keep pace with the growing system. The fixed route fleet and paratransit fleet status will be discussed in detail by Central Garage representatives. Please note access to discretionary funding for capital expenses has been drastically reduced. • The Metro Transit Garage (MTG) was built in late 2006. At the time, the facility was built 25% larger than the current need identified. This number has been exceeded and the MTG will require an expansion in the future. • The Ground Transportation Center (GTC) was built in 1984 and acts as the main hub/transfer center for both Fargo and Moorhead. Moving forward the GTC will require on-going upkeep. • Federal and State funding is unpredictable, as there is not an existing transportation bill. Allocations of formula money become available incrementally. • Fargo is a large regional destination for medical care. As the population ages and becomes unable to drive, transit becomes a viable option for residents and visitors. That aging population will be the largest generation to require services. • Technological advances are introduced industry-wide on a regular basis. It is essential to have staff capable of recognizing the needs, planning with the IS Department for the addition/introduction of necessary equipment/software, and follow the process to fruition.

Description of Service Provided	Current or Emerging Issues
<p>General Division</p> <p>Municipal infrastructure inventory and long-range planning</p> <p>Citizen support services</p> <p>Sanitary Sewer Issues and Inquiries</p> <p>Coordination and management of cross functional agreements with other units of local, state, and federal government</p> <p>Maintains infrastructure records in excess of 100 years old</p> <p>Special Assessments-Benefit Calculations and spreading of those benefits.</p> <p>Manage and update Infrastructure Funding Policies.</p>	<p>Many miscellaneous areas of requests for information and for assistance. This area is fairly consistent each year. We are looking forward to the rollout of City Works to assist in the tracking of these requests.</p> <p>Efforts are ongoing to improve access to digital records.</p> <p>Need to create redundancy and provide cross training within this department.</p> <p>Policy was last updated in 2013 and is currently under review for changes to be implemented for 2016 construction projects.</p>
<p>Design and Construction Division</p> <p>Design and construction administration.</p> <p>Bidding process.</p> <p>Construction specifications and standards.</p> <p>New construction, reconstruction, and rehabilitation of municipal infrastructure.</p> <p>Oversight and management of a strategy for Watermain Replacement.</p> <p>Pavement Management Program.</p> <p>Sidewalk construction and reconstruction Program.</p> <p>Plan Review (In house- and Consultant designed) for New and Rehabilitation projects.</p> <p>Coordination of Sewer Spot Repair projects with Public Works.</p> <p>Day to day implementation and management of sewer repair policy.</p>	<p>Responsible for consistency of practices in the design and installation of infrastructure.</p> <p>Need for online bidding in near future.</p> <p>Primary responsibility for keeping City construction practices up with industry standards.</p> <p>These are currently suffering due to new development pressure driving up costs and taking contractors from the bidding pool, causing projects to be delayed and increasing the backlog of work to be completed.</p> <p>Over all City index is good, largely due to new streets that raise the average. However, to continue to maintain an acceptable rating a larger investment needs to be made in the Pavement Rehabilitation Program.</p> <p>This is driven completely by public requests and needs.</p>

Description of Service Provided	Current or Emerging Issues
<p style="text-align: center;">Engineering Services Division</p> <p>Support Platting Process with Technical Analysis of proposed plats</p> <p>Pre Development Support for Developers</p> <p>Site plan reviews</p> <p>Right of Way Acquisition, including permanent and temporary easements</p> <p>Annual Reporting</p> <p>Provides mapping support city-wide</p> <p>Surveying, building, and lawn grades, sidewalk.</p> <p>Row of Way Occupancy and Encroachment Management including the development of appropriate agreement documents</p> <p>Excavation permitting</p> <p>Mapping Utility locations & Providing field locates for City Owned Utilities</p> <p>New Development –Design and Construction Administration and Construction Inspection</p> <p>Oversight of Consultants that have been hired to perform Design, Construction Administration, and Construction Inspection of New Developments</p>	<p>We received a high numbers of requests for new developments in 2013, 2014 and 2015.</p> <p>With the number of plats we have a high level of coordination for pre development meetings and site plan reviews. This has taken staff away from the normal design activities. The size and complexity of Site Plans has increased the time needed for staff review.</p> <p>Service provided for both new developments and reconstruction projects. Needs in this area have been escalating and to keep up with the demand many duties have been pushed to the City Attorney’s office.</p> <p>The rollout of Masterworks has made the annual reporting more efficient.</p> <p>Survey experienced some staffing challenges this year and consultants were brought in to support several construction projects.</p> <p>We have seen an increase in encroachment requests related to a heightened awareness by lenders requiring documentation of any encroachments found during alta surveys of property subject to mortgages.</p> <p>As construction activity grows permitting and locating responsibilities pick up as well. There has been a continuous demand for Right of Occupancy Requests associated with private utilities</p> <p>In addition with the aggressive rollout of Mid Continent we hired 3 contract employees for a period of 3 years (2014-2017) to assist us in keeping up with the effort.</p> <p>We are seeing a general increase in requests due to other construction projects including the in town levees associated with the Diversion and we will need an additional full time locator to continue to meet the demands of current construction along with continuous growth. We have not expanded our locating department since the inception of ONE CALL over 13 years ago.</p> <p>Driven by developer requests for infrastructure. Currently a heavy load. \$24 Million has been bid to date in 2014 with an additional \$10 Million expected by year end. This does not include carry over from 2014. This area continues to be aggressively expanding.</p>

Operational Measures

Description	2014 Actual	2015 Expected	2016 Projected
Number of Projects Bid	75	51	60
Excavation Permits	3,540	4,500	5,720
Right of Occupancy Permits	9	10	12
One Call Tickets	\$19,000	\$19,820	\$21,000
Elevation Certificate Surveys	238	800	600
Sidewalk Survey	309	370	445
Driveway Survey	325	355	410
Yard Grades	332	415	520
Encroachment Agreements	5 + 15 for 25 th St	6 pending (not to CC yet)	7

- One Call Tickets were \$1.10 in 2014 and 2015.
- Midcontinent is now franchised which will reduce the Right of Occupancy Permits.

Description of Service Provided	Current or Emerging Issues
<p>The Traffic Engineering Department includes the City Transportation Engineer and the Sign and Signal Shop Operations. The Department is jointly operated and managed as part of the City's Engineering Department. The Traffic Engineering Department is responsible for the following activities:</p> <ul style="list-style-type: none"> • Design, operation, management and maintenance of the City's traffic signal & intelligent transportation system • Installation and maintenance of all regulatory, parking and warning signs (approx 25,000) • Conducting traffic studies & traffic calming program • Construction administration of traffic signals, pavement markings and traffic safety devices • Coordinate and staff the City's Traffic Technical Advisory Committee • Review traffic related features of site plans, plats and long range plans, most notably access control for driveways and intersections to city roadways. • Coordination & planning with NDDOT & Metro COG federal Aid transportation improvement projects • Coordination with contractors on lane/road closures, and other entities for special event traffic control • Responsible for shared use path planning and construction • Responsible for management of city bridges • 9 full time staff – 4 located in City Hall, 5 at Sign & Signal Shop 	<ul style="list-style-type: none"> • Construction inflation costs continue to escalate in this economic climate in ND where work is plenty and contractors overburdened. Pavement markings and traffic signal costs are increasing 10-15% per year. • Improved intersection traffic controls at intersections, whether it be flashing yellow left turn arrows at traffic signals or it be roundabouts at other intersections, will continue to be recommended for implementation. • The Complete Street design concept, or streets planned and designed for all users, will continue to be recommended for implementation, as recommended in the GO2030 comp plan. • As the City continues to grow and how the traffic signal world becomes more technologically based, there will be a need in the future for a new FTE for a Traffic Signal Electronic Specialist to assist with maintaining the Citywide system.

Description of Service Provided	Current or Emerging Issues
<p>The Public Works Street Department strives diligently to preserve and enhance the social and environmental quality of life in the City of Fargo. Through effective, efficient, and quality service the department not only maintains but focuses on improving public infrastructure that will assist in safeguarding the health, safety and welfare of all citizens.</p> <p>The Street Department provides a wide range of services essential to the public which can vary from street and utility repair to fighting major floods and snow storms. Overall the department's primary responsibilities can be categorized into the following activities:</p> <ul style="list-style-type: none"> • Street & Bridge Maintenance: <ul style="list-style-type: none"> ○ Asphalt & Concrete Street Repair ○ Mudjacking ○ Gravel Street & Alley Maintenance including dust control ○ Sweeping ○ Snow Removal & Anti Ice Measures for all Public Streets ○ Maintenance & Snow Removal of all City Owned Sidewalks • Gravity Sanitary Sewer System Maintenance & Televising • Storm Sewer System Maintenance & Televising • Right-of-Way Grooming • Street Sign Designation Replacement & Repair • Sidewalk Ordinance Enforcement • Parking Restriction Enforcement 	<ul style="list-style-type: none"> • The current rapid expansion in city development will have long term effects on departmental functions and without adequate additions to staffing a decline in levels of service will take place causing frustration for the taxpayer. • Both fleet expansion and increased equipment size has caused Public Works to quickly outgrow current facilities. Short term accommodations have been met through the rental of 30,000 square feet of building storage from the Fargo Park District but a long term solution will need to take place in the near future. <p>Snow storage for snow removal and other required widening and hauling operations is quickly becoming a rising issue. The need to purchase and develop permanent city owned snow storage facilities continues to be a priority.</p>

Description of Service Provided	Current or Emerging Issues
<p>Along with its two divisions, Emergency Services and Transit, Central Garage provides a wide range of services to the City of Fargo departments. This is achieved by operating a maintenance facility and parts storeroom at both the Public Works building and the Metro Transit Garage. Overall the department's primary responsibilities can be categorized into the following activities:</p> <ul style="list-style-type: none"> • Vehicle and Equipment Procurement • Developing and managing the vehicle and equipment replacement schedule • Liquidation of assets • Preventative Maintenance Program • Vehicle and Equipment Repairs • Major Repair Outsourcing • Road Service Assistance • Process Licensing Documents • Insurance Claim Processing • Fuel Contract Purchases • Fuel Sales to other Governmental Agencies • Fueling Site Operation and Maintenance at Public Works and Metro Transit Garage • Track Lifecycle Costs for Vehicles and Equipment • DOT inspections, breathing apparatus certification, aerial equipment certification • Parts Storeroom <ul style="list-style-type: none"> ○ Perform inventory control procedures ○ Ensure parts are processed to the work orders ○ Provide monthly billing reports ○ Reconcile purchasing documentation 	<ul style="list-style-type: none"> • Our biggest challenge continues to be hiring and retaining qualified technicians. Nationwide there is a severe shortage of technicians and this is a trend that will continue for some time as the number entering the workforce is not keeping up to the technicians retiring. • The rising cost of vehicles and equipment is putting a strain on the vehicle replacement budget which replaces vehicles and equipment for the General Fund Departments. For those departments we have over \$35,000,000 in vehicles and equipment. If we give everything a 15 year life cycle, to replace them on this 15 schedule we would need \$2,330,000/year. • Finding room for vehicles and equipment is another area where we are challenged. We are forced to park some of this equipment outside where they are exposed to the elements. While this is okay for cars and pickups, leaving larger equipment exposed to the elements causes accelerated wear and increases repair costs. • Additional maintenance costs are being experienced with the mandate of cleaner emissions and utilization of advanced technology. It is not uncommon to see a \$5,000 cost just for the diesel particulate filter and the diesel catalyst filter.

Description of Service Provided	Current or Emerging Issues
<p>The Fargo Fire Department is dedicated to providing the community with progressive, high quality preventive and emergency services. 121 full time employees provide fire prevention, safety, and emergency education as well as emergency response to medical, fire, hazardous material, and technical rescue response. The fire department operates out of seven fire stations strategically located throughout the city. The department staffs seven engine companies, two ladder companies, and two battalion vehicles. The fire department service is usually considered a public good that has traditionally been provided by the community for the benefit of its citizens. By publicly providing these services, citizens can have services that would be cost prohibitive for individuals to provide for themselves. Consistent with that philosophy, the Fargo Fire Department continually recognizes the value of serving the needs of the citizens. Firefighting forces are the assets that protect the community's economic and tax base as well as its health and welfare. This is a valuable asset that must be carefully provided and wisely managed.</p> <p>The FFD collaborates with many other fire protection agencies at the local, state, and federal levels. The department is organized into four divisions: Fire Administration, Fire Prevention/Inspection/ Investigation, Emergency Operations, and Support Services.</p> <p>Fire Administration is responsible for all department activities, liaison to other city departments, accreditation, human resource issues, and final determinant in all budgetary matters.</p> <p>Fire Prevention provides proactive prevention services, such as fire safety inspections of commercial and University property, site plan reviews, and fire prevention education.</p>	<ul style="list-style-type: none"> • Community growth is requiring that we look at adding a fire station in South Fargo in the near future. We have seen a growth in call volume of 273% in the past 3 years. • Facilities are need of updating. Fire Headquarters is not set up for efficient and effective service delivery. The building continues to have plumbing, electrical, and roof issues. The City Commission approved remodeling this building in 2015. • The fire burn building located with Station 4 is in need of repairs. The building is over 30 years old and the interior protective coating is starting to fall off. The facility needs to be made usable in the interim but a new facility is needed. • With the community growth we continue to upgrade and add to our warning system. New sirens are needed as well as replacement. • Changes in fire department responses have caused us to evaluate how we would respond with Fargo PD to an active shooter situation. Additional protective equipment needs to be purchased to ensure firefighter safety in these situations. • Annual fire service business inspections continue. In an effort to be more efficient and effective we are working to transition into a paperless system.

<p>Fire Support Services plans, develops, and coordinates in-house training activities through the assistance of two training captains. This division also oversees the City's Emergency Management program. The Assistant Chief of Support Services serves as the accreditation manager. The department recently became reaccredited by the Commission on Fire Accreditation international.</p> <p>Emergency operations services include emergency medical services, fire suppression, hazardous materials and technical rescue response. This division also oversees all facilities and equipment purchasing. This division all conducts commercial building inspections, hydrant flushing, and public education.</p>

Description of Service Provided	Current or Emerging Issues
<p>The Police Department provides the community with a wide range of both basic and emergency policing services, which include investigating and resolving crime, enforcing the city's traffic regulations, responding to calls-for-service received from the general public, and mitigating the other public-safety concerns coming to our attention.</p> <p>The department is divided into two operational divisions –Field Services (patrol) and Support Services (Investigations and Administrative Services) each of which is commanded by a deputy police chief.</p> <p>The Field Services Division is sub-divided into four patrol districts, each of which is managed by a police lieutenant who is responsible for police operations within their district. Each district is further divided into three patrol areas where the officers assigned each area are supervised by a police sergeant.</p> <p>The department utilizes processes known as “<u>CompStat</u>” and “Intelligence Led Policing” which facilitates the use of data to assess when and where department resources are deployed, thus making the most effective and efficient use of those resources.</p> <p>The primary services provided include:</p> <ul style="list-style-type: none"> • Patrol • Investigations • Emergency Response • School Resource Officers • Downtown Resource Officers • Crimes Against Children Investigations • Cultural Liaison Officer • GLBT Liaison Officer • Native American Liaison Officer • Animal Control • Parking Enforcement • Crime Prevention • Records Management 	<p>As Fargo continues its rapid and vibrant expansion, the public-safety issues associated with such growth are likely to increase as well. In order to maintain a relatively low crime rate throughout the city, the police department will need to add both sworn and non-sworn personnel at a rate that meets or exceeds the city's growth rate (I have included spread sheets describing the necessary personnel needed for the future). In addition, the department's on-going initiatives to mitigate crime through prevention, public interaction and public awareness will be the best approach towards maintaining the existing quality of life status throughout the city.</p> <p>The rapid geographic and elongated growth of the city presents a significant challenge for the police department's response capabilities. The city is in the process of giving the police department the old health department building across the street when the health department vacates it. Although we are grateful for the much needed space and parking, I would like to see the city plan for a police station in the future. The city could consider three different options.</p> <ul style="list-style-type: none"> • A stand alone Fargo Police station more centrally located in the city. • A combined effort with the Cass County Sheriff's Department for a joint law enforcement center. • Keep the current building downtown and add a second precinct station, moving approximately half of the department to a location in the southwest part of the city.

Description of Service Provided	Current or Emerging Issues
<p>Fargo Cass Public Health mission is to assure a healthy community for all people through ongoing assessment, education, advocacy, education, prevention and collaboration. Currently there are 134 employees equating to 121 FTE's , at this time there are 4 open positions (3.2FTE)</p> <p>The major services delivered include:</p> <ul style="list-style-type: none"> • Environmental Health (food inspections, water quality, nuisance complaints, other) • PH Emergency Preparedness • WIC Nutritional Supplement Program • Health Promotion (obesity prevention, tobacco prevention, worksite wellness) • Clinic based services (family planning, immunizations) • Nursing: home based, school, correctional health • Disease Control (tuberculosis, sexually transmitted disease, HIV) • Gladys Ray Shelter • Fargo Detox Center • Grants management 	<ul style="list-style-type: none"> • We continue to see a decrease in funds from existing federal and state grant sources. We need to continue to seek out alternative grant sources and position FCPH to be eligible for other funding sources. • The new building on 25th St and 13th Ave will be completed within the next month. The goal is to have all staff moved by September 1. • We are seeing an increase in grant funding that is being awarded on a regional basis and not per county. This trend has increased our need to work collaboratively with other counties in the SE region. I anticipate that this trend will increase as federal and state funding patterns change. • Transition from paper to electronic health records continues. • Preparation has begun to obtain National Public Health Accreditation. This will be a 12-18 month process. Doing so will allow us to be eligible for additional federal and state funding, as well as other private foundation funds.

Description of Service Provided	Current or Emerging Issues
<p>Technology Access to include Public Internet, Wireless Internet and Printing: All Library locations provide public Internet stations, wireless access and printing for a small fee. Staff is also available to assist patrons with technology related questions.</p> <p>Access to Books and AV Materials including non-English language resources: The library provides both print and audio visual items for all ages to include a world language collection for non-English speaking residents. In 2014 Fargo Public Library circulated over 1 million items to local citizens and had over half a million.</p> <p>Access to Statewide E-Content: The library is part of a statewide E-book consortia known as Library 2GO. Our membership allows the citizens of Fargo to have access to E-content from twenty-eight different libraries statewide.</p> <p>Technology Instruction/Programming: We provide beginner computer and Internet classes to the public. We also provide beginner mobile device classes that give an overview of the many devices and how to use a mobile device to access E-books. We also provide programs related to emerging technologies such as 3D printing.</p> <p>Children's Early Literacy Programming: The library's children's department provides a number of programs designed to promote early literacy skills such as Baby Rhyme Time, Story time for Preschoolers and Toddlers and Ready to Read workshops for parents and guardians.</p> <p>Cultural Events: The library provides a wide variety of cultural events such as the Fall Jazz Concert series, author visits, story tellers and film series.</p> <p>Inter-Library Loan Services: Fargo residents are able to receive materials from other libraries around the country through our Inter-library loans services.</p>	<p>Continued growth of the community and user expectations: The continued growth of the community adds the challenge of expanding programming and collections with limited resources. The citizens of Fargo continue to request additional programming and services. Families have requested the expansion of children's programming to evenings and weekends. Newer retirement communities have requested to participate in our Outreach Services. At our current staffing levels we are unable to provide Outreach Services to additional agencies. Similarly, any significant expansion of weekend and evening programming would only be possible with limiting current programming.</p> <p>Impact of the Ed Clapp Elementary School: The planned opening of the Ed Clapp Elementary School in the fall of 2015 has the potential to greatly impact the Dr. James Carlson Library. The challenge will be to maintain the current level of services to current visitors while meeting the program, collection, and staff-time needs of the students.</p> <p>Continue Growth in the demand for Electronic Content i.e. E-books: The continued growth of the number of mobile devices in our community has fueled the continued demand for more E-book and E-Audio book offerings from our Library 2Go consortia.</p>

Description of Service Provided	Current or Emerging Issues
<p>Access to Electronic Databases: The library provides a wide variety of online resources. The topics include: Auto Repair, Books and Reading, Encyclopedias, Genealogy, Health Resources, Investing, Language Learning, Legal Resources, Library Catalogs, Local History, Magazines and Newspapers, Non Profits, Research, Small Business, Teachers and Educators, Test Preparation and Skill Improvements.</p> <p>Reference and Readers Advisory Services: The library provides staff dedicated to assisting patron's informational needs.</p> <p>Community Gathering Spaces: Each library location has meeting/program space available for community businesses, organizations and individual citizens.</p> <p>Recreational and Educational Programming for all Ages: Along with the cultural programs discussed above, the library continually provides the community a diverse offering of programs for all ages. http://www.cityoffargo.com/CityInfo/Departments/Library/CalendarofEvents</p> <p>Outreach Services: The library provides library materials to citizens in over twenty retirement and assistant living facilities to include a number of homebound individuals.</p> <p>Job Seeker Services: The library has provided classes for resume' building and interview skills.</p>

Description of Service Provided	Current or Emerging Issues
<p>The City Commission Office provides administrative services in support of the governing body including the Mayor and City Commissioners as well as the City Administrator. The Office also serves as the contact between constituents and their elected officials.</p> <p>The major services delivered include:</p> <ul style="list-style-type: none"> • City Commission agenda creation • Compilation of agenda packets to include review of recommended motions to assure appropriate action by Commission • Preparation of on-line agenda packets to link agenda items with background information • Preparation of City Commission minutes • Proper follow-up of City Commission actions taken at meetings • Review of pending legislation prior to and during Legislative sessions and work with Legislators and various Departments • Ensure proper media notification of meetings to conform with open meetings laws • Liaison between City departments and the Commissioners • Liaison between the public and Commissioners • Arrange meetings for the Mayor and City Commissioners and the City Administrator • Preparation of Proclamations • Preparation of various documents for the Mayor, Commissioners and City Administrator 	<ul style="list-style-type: none"> • This department is currently involved in implementation of a new agenda and meeting management software program, ensuring that all legal requirements and proper procedures for minutes are included. It was expected to provide better information about agenda items and allow constituents to access discussion of specific agenda items on the meeting video without listening to the entire meeting. That part has worked out; however, the minute portion has been problematic. • This department has been assisting the HR Department with digitizing a substantial amount of documents

Description of Service Provided	Current or Emerging Issues
<p>Capital assets are a key part of providing quality services to our citizens. Resources need to be allocated in amounts sufficient to meet the demands of our growing City.</p> <p>All General Fund capital outlay requests are accumulated in the Capital Outlay Division for ease of budgeting and tracking. There is a detailed schedule of capital outlay requests and related funding in later section of this document.</p> <p>Department Heads are responsible to forecast their need for capital items to include buildings, heavy equipment, vehicles, equipment, software and other items that may be unique to their service delivery.</p> <p>The Budget Team reviews all capital requests and allocates budgetary resources for the highest priority initiatives. In some cases a fixed dollar amount is allocated and Department Heads can determine which items will be purchased.</p>	<p>Capital outlay funding has been reduced slightly as a result of supplemental funding approved out of the 2014 General Fund surplus. A detailed schedule of capital requests can be found starting on page 173. Departmental requests total \$ 9.1 million, while recommended funding levels were set at \$7.26 million. This budget funds about 79% of the requested items.</p> <p>The Budget Review Team is recommending reductions in funding levels for vehicle and computer replacements due to a shift in life cycle strategies deployed in the past. This change will be evaluated as we move forward to assure that Departmental resources are adequate to fund required services.</p> <p>The largest item of capital outlay is for street repair and maintenance projects. A total of \$4 million has been appropriated for this purpose.</p> <p>We anticipate a final decision on construction of a new City Hall by the end of 2015.</p>

Vehicle Replacement

Description of Service Provided	Current or Emerging Issues
<p>The Fleet Purchasing Department provides a wide range of services essential to all departments by utilizing the City of Fargo Purchasing policy. Overall the department's primary responsibilities can be categorized into the following activities:</p> <ul style="list-style-type: none"> • Product evaluations • Vendor demonstrations • Department Requests • Fleet justifications • Developing equipment specifications • Requesting Proposals • Asset Management • Auction Services • Equipment Liquidation <p>Enterprise fund vehicles and equipment are charged directly to the fund that utilizes them and are not included in this Divisional budget.</p> <p>This cost center is used to track ongoing end of life unit replacement of our fleet. Significant funding is needed to replace unit on a timely basis. Failure to replace them in an optimal timeline drives up repair costs.</p> <p>A Vehicle Replacement Committee meets periodically to monitor replacement recommendations and strategies to get the most value from our investment in these assets.</p>	<ul style="list-style-type: none"> • Rapid rise of equipment cost due to diesel engine emission changes (40% increases since 2007). • Both fleet expansion and staffing increases make equipment requests difficult to fulfill within the given budget. • Cost benefit of early cycle trading to keep up with inflation and equipment's useful life. • In the past some used units were purchased for our passenger cars and pickup trucks. As the cost of used cars has risen we have discontinued this practice and are purchasing new units. <p>Expected future equipment cost.</p> <ul style="list-style-type: none"> • Fire Truck (Ladder) \$950,000 • Fire Truck (Pumper) \$550,000 • Squad car w/equip \$60,000 • Snow Plow Truck \$170,000 • Motor grader \$285,000 • Street Sweeper \$240,000

Description of Service Provided	Current or Emerging Issues
<p>Fund transfers are used to move General Fund resources to other governmental funds for specific purposes.</p> <p>Specific uses include local share of capital grants, debt service, special revenue funding and capital projects.</p> <p>Certain budgeted expenditures are reclassified during the Comprehensive Annual Financial Report as transfers to other funds.</p>	<p>Fund transfers increased in the 2016 budget due to expected debt service payments on long term debt for the City Hall and Fire Station remodeling projects. General fund resources are being used to make the required debt payments. This new debt will be issued in late 2015 or 2016.</p> <p>The construction loan for the Fargo Cass Public Health facility remodeling project that was completed this year is scheduled for payment in full by year end.</p> <p>Debt service requirements will increase in 2017 once bonds are issued for the new City Hall.</p>

Fund Description	Fiscal Trends and Comments
<p>There are seventeen Special Revenue Funds maintained by the City of Fargo.</p> <p>Special Revenue Funds are used to account for specific revenues that are legally restricted to expenditures of a particular purpose.</p>	<ul style="list-style-type: none"> • The Emergency 911 fund has been discontinued due to a change in tax collections that are now handled by Cass County, effective January 1, 2015. All costs related to the Red River Regional Dispatch Center are funded by Cass County. • The original cost of Newman Outdoor Stadium was fully recovered in 2014. The Baseball Stadium fund will be discontinued in 2016 and merged with the General Fund in a separate Division. • The Budget Team and the Parking Authority members are recommending increases in municipal parking fees in 2016 to help fund and expand our municipal parking operations.

Notes:

Fund 204 Emergency 911 was closed out in 2015, this function is now handled by Cass County after voter approval to consolidate this activity

Fund 268 Baseball Stadium accounting has been merged with the General Fund in 2016. Transfers will be made in the future to eliminate this deficit.

Fund Description	Fiscal Trends and Comments
<p>Debt Service Funds are used to accumulate resources for the payment of long term debt.</p> <p>Financial resources are provided from various sources depending upon what type of debt is issued and what revenue streams are pledged for debt repayment.</p> <p>The City of Fargo has several different debt types currently outstanding and routinely issues additional bonds for infrastructure capital financing.</p> <p>Fargo is highly rated by Moody's and Standard & Poor's Corporation. Moody's assigns an Aa1 rating for Fargo's refunding improvement bonds while Standard & Poor's assigns an AA- rating. Their credit rating reports cite strong economic data and consistently managed financial results.</p>	<ul style="list-style-type: none"> • Adequate financial resources are available to pay all scheduled debt service payments and maintain the City's bond covenant requirements. • The City anticipates the issuance of Sales Tax Revenue Bonds of \$40 million to fund flood control projects and Refunding Improvement Bonds of \$25-30 million in 2016 to fund ongoing infrastructure expansion • Long term bonding for the City Hall construction project will be recommended as soon as final plans are approved. • All State Revolving Loan Fund debt service reserves are fully funded with the exception of Series 2013B. The funding of this reserve will start in 2016 as work begins on a Water Treatment Plant expansion. • The City anticipates the maintenance of our existing bond ratings with Moody's and Standard & Poor's Corporation.

Fund Description and Purpose	Fiscal Trends and Comments
<p>Capital Project funds are used to account for ongoing investment in municipal capital assets. Currently, the State of North Dakota's budget law does not require a budget for capital project funds, and therefore none is presented.</p> <p>Fargo is a large regional economic center that requires quality infrastructure. Continued and systematic expansion of the City creates the need for extended collector roadways, local neighborhood streets, bridges, flood control assets, sanitary sewer, storm sewer, and water and wastewater infrastructure. As a result of continued need for infrastructure, voters have approved a local sales tax to help fund these expensive projects. Sales taxes are our largest single revenue source.</p> <p>A formalized and long term capital improvement plan that spans a twenty-year planning horizon is updated annually for all municipal utility assets to include water and wastewater systems. A master planning effort links the needs of critical infrastructure projects to funding sources. Projects related to the utility master plan are incorporated into the budget approval process.</p> <p>General infrastructure planning for streets & roadways, subdivision underground utilities, pavement management, sidewalk construction, flood control projects, and other non utility projects are administered by the City Engineering Department. A capital improvement plan is prepared annually at year-end which provides authorization to proceed with the subsequent year's construction season.</p> <p>All assets in excess of \$5,000 with an expected life of at least two years are capitalized and reported in the annual financial statements.</p>	<ul style="list-style-type: none"> • Demand for expansion of new housing subdivisions is strong. The amount of building permit values issued in 2014 was at an all-time record. • A single largest capital project in 2016 is the expansion of our water treatment plant. The expansion will increase our capacity to 45 mgd and will be capable of removing sulphate from Devils Lake discharges into the Sheyenne River. This includes actual plant expansion and work on the Sheyenne River pumping station. • Work continues on a multi-year flood control capital improvement plan to raise our flood levees to a higher level and seek a permanent long term solution to protecting ourselves from flooding. Funds will be allocated for home removals and raising protection levels along the Red River Corridor when the Engineering Department's capital improvement plan is approved in December. • Work has begun on flood mitigation projects. Construction began on the Oxbow, Hickson and Bakke flood control project in June 2014. Work on eligible elements of the FM Diversion project will continue in 2015 & 2016, however, large scale construction is not anticipated in 2015 pending the appropriation of Federal funds and resolution of an existing law suit which halted the construction of the levee portion of this project.

This page is intentionally left blank.

Fund Description	Fiscal Trends and Comments
<p>The City of Fargo operates ten Enterprise Funds to provide traditional municipal utility services to our citizens. There are approximately 30,000 customers serviced in our municipal utility services.</p> <p>They include Water, Wastewater, Solid Waste, Forestry, Street Lighting, Storm Sewer, Vector Control, Southeast Cass Sewer, Municipal Airport and the FargoDome.</p> <p>The Water fund is the largest municipal utility and is shown as a major fund in this budget document.</p> <p>Enterprise funds are operated on a business-like basis and each fund carries all assets within the fund with final measurement of net assets.</p> <p>Utility rates are monitored annually and set by resolution of the Board of City Commissioners.</p>	<ul style="list-style-type: none"> • There are no rate increases proposed in the 2016 budget for utilities. • A recent comparison of Fargo's utility bill for an average household for water, wastewater and storm sewer fees was \$53 per month. Other communities in North Dakota range from a low of \$34 to \$79. Minnesota communities ranged from \$27 to \$104. • Local sales tax revenues are used to pay for capital projects associated with utility infrastructure and, as a result, Fargo has been able to keep utility rates constant for the past several years. • A twenty-year capital improvement plan and related revenue adequacy model is updated annually to assure that there will be adequate resources to provide high quality utility services. This includes rate revenue as well as sales tax revenue for capital programming. • A water treatment plant expansion is currently underway that will increase Fargo's treatment and distribution capacity to 45 mgd. • Wastewater reuse is currently utilized and this byproduct is sold for the production of ethanol in a nearby community. • Fargo will become a water service provider in 2016 for the City of West Fargo. • The Fargodome long-term capital escrow fund balance was \$40.6 million for 2014.

Description of Service Provided	Current or Emerging Issues
<p>The Water Treatment Plant is responsible for operating and maintaining a state-of-the-art 30 million gallon per day (MGD) surface water treatment plant and all reserve storage facilities that supplement the City's water distribution system. The reserve storage facilities include 11 elevated storage tanks and 2 ground storage reservoirs and pumping stations with a total capacity of 20 million gallons. The water treatment plant supplies safe drinking water to the City of Fargo and portions of the Cass Rural Water Users District (consecutive user).</p> <p>The City's surface water treatment plant utilizes water from the Red and Sheyenne Rivers. River water is delivered to the WTP through pumping stations located on both the Red and Sheyenne Rivers. At the WTP, the water goes through a series of treatment processes including pretreatment, lime and soda ash softening, ozone disinfection and filtration.</p> <p>Following treatment, the finished water is pumped through the City's water distribution system to meet the daily and peak demand of consumers.</p>	<p>In 2015, the City began construction on a WTP expansion project. The project will involve installation of a parallel membrane treatment system which will expand the overall treatment capacity to 45 MGD. The new treatment system will include pretreatment, MF/UF (micro/ultra filtration) membranes, RO (reverse osmosis) membranes and disinfection. The capital expense associated with the WTP expansion will be financed with infrastructure sales tax and ND State Water Commission grant funds.</p> <p>The West Fargo City Commission approved a Water Service Agreement with Fargo in July, 2015. The 2016 budget has been increased to account the additional requirements for water production and pumping. The total increase in the proposed Division 3051 Water Treatment budget is consistent with predicted O&M cost increase to serve West Fargo during planning.</p> <p>To prepare for increased regional water service due to West Fargo, there will be regionalization-related capital projects constructed, including two West Fargo booster pump stations and Sheyenne pump station improvements. The Water Utility is anticipating the use of infrastructure sales tax funds to cover these costs and is seeking potential grant funds.</p>

Description of Service Provided	Current or Emerging Issues
<p>The Mains and Hydrants Department provides a wide range of services essential to the public which can vary from fire hydrant repair to repair of broken water mains and even assisting with flood/snow events.</p> <p>The major services delivered include:</p> <ul style="list-style-type: none"> • Repair of Water Main Failures • Fire Hydrant Maintenance Program • Water Main Valve Exercising Program • Water Main Valve Maintenance • Street Patch Repair • Water Service Inspection • New Construction/Rehab Inspection • Boulevard Restoration and Repair • Water Service Repairs • Water Main & Service Locations • Water Main Tapping Service • Assisting other Departments 	<ul style="list-style-type: none"> • The winter of 2014/2015 was relatively mild. However there were still issues with frozen water services. This required a combination of mechanical thawing and physically digging the service to repair. • The water main gate turning program is growing in importance requiring more attention. The program is a proactive approach to maintaining water distribution condition. • The department continues to work on utilizing technology to better manage our assets. Currently, digital mapping through ArcGIS is utilized in the field. This year the asset management software CityWorks will be implemented. In addition, the department is working on purchasing new leak detection equipment to more efficiently locate leaks within the distribution system. • Midcontinent Communications started infrastructure expansion in 2014 and continues expanding services to Fargo. They have a three year plan to cover the entire city. The expansion has greatly increased water main locates within the department.

Description of Service Provided	Current or Emerging Issues																														
<p>The Water Meters division is responsible for procuring and installing all public water meters in the City of Fargo ranging in size from 5/8-inches to 10-inches. The division is also responsible for the replacement, calibration and maintenance of all public water meters in the City. At the request of the Auditor's office, the division conducts all water service shut-off or turn-on activities. At the request of the Auditor's office, the division assists with gathering monthly meter reading data for billing purposes. The meter count at the end of 2014 was as follows:</p> <table> <tr> <th>Meter Size</th><th>Count</th></tr> <tr> <td>5/8</td><td>13,585</td></tr> <tr> <td>3/4</td><td>11,554</td></tr> <tr> <td>1</td><td>793</td></tr> <tr> <td>1-1/2</td><td>1,175</td></tr> <tr> <td>2</td><td>1,062</td></tr> <tr> <td>3</td><td>233</td></tr> <tr> <td>4</td><td>75</td></tr> <tr> <td>6</td><td>18</td></tr> <tr> <td>8</td><td>3</td></tr> <tr> <td>10</td><td>7</td></tr> <tr> <td>TOTAL</td><td>28,506</td></tr> </table>	Meter Size	Count	5/8	13,585	3/4	11,554	1	793	1-1/2	1,175	2	1,062	3	233	4	75	6	18	8	3	10	7	TOTAL	28,506	<p>The Water Meters division currently obtains (reads) individual monthly meter data via manual reads, handheld touch pad devices or mobile radio devices. At this time, the meter reading technology distribution is as follows:</p> <table> <tr> <td>Manual Read Meters</td><td>3</td></tr> <tr> <td>Touch Pad Read Meters</td><td>19,576</td></tr> <tr> <td>Mobile Read Meters</td><td>8,927</td></tr> </table> <p>The meters division has been researching/evaluating newer technology for obtaining monthly meter data. The newer technology is referred to as fixed network where all meter data can be obtained from a central location. The division is researching a migrate-able system to allow continued use of the City's existing radio read meters.</p>	Manual Read Meters	3	Touch Pad Read Meters	19,576	Mobile Read Meters	8,927

Description of Service Provided	Current or Emerging Issues
<p>Water revenue bonds have been issued to pay for the water treatment plant built in 1992.</p> <p>Pursuant to the bond resolution, a bond fund has been established to pay for the long-term debt outstanding.</p> <p>Bonds were issued in 1992 and were refinanced in 2007. They have a final maturity date of 1/1/2017.</p> <p>All bonds from this series are non-callable bonds and will be paid in accordance with the existing debt service schedule.</p>	<p>Construction of an expanded water treatment facility began in 2015. This project will be funded by North Dakota State Water Commission appropriations and the local share will be financed with the issuance of State Revolving Fund loans repaid with infrastructure sales tax.</p> <p>The expanded plant will increase Fargo's water treatment capacity to 45 mgd and sulphate removal equipment will be installed.</p>

Description of Service Provided	Current or Emerging Issues
<p>The Wastewater Treatment Plant (WWTP) is responsible for the treatment of wastewater before it can be discharged into the Red River. The WWTP has the capacity to treat an average daily flow (ADF) of 17.5 million gallons per day (MGD). In 2014, the ADF was 12.839 MGD resulting in a total of 4.686 billion gallons of treated. The WWTP recorded a one day peak flow of 22.587 MG.</p> <p>The WWTP employs a mechanical and biological process creating a high quality effluent that is discharged to the Red River after meeting strict regulatory standards. Biosolids (solids) accumulated and generated in the wastewater process are treated (stabilized) using a biological process known as anaerobic digestion. One of the beneficial byproducts of the digestion process is methane biogas. This biogas is used to heat WWTP buildings in the winter months. Stabilized biosolids are then dewatered using drying beds and belt filter presses. Dewatered biosolids are disposed of in the city's landfill. The total amount of biosolids delivered to the landfill in 2014 was 3,588 dry metric tons.</p> <p>The WWTP also operates and maintains 63 sanitary lift stations throughout the City as well as the surrounding area. The SE Cass sewer system, which includes many rural subdivisions and small cities, utilize over 75 grinder pumps that are maintained by WWTP staff.</p> <p>The Sump Pump Compliance program has been reclassified to a Wastewater Compliance group. This change will allow staff to regulate the sump pump and foundation drain program, but will expand duties to include investigation of fats, oils and grease (FOG) issues, odor complaints, sample collection and provide assistance with the EPA regulated Industrial Pretreatment Program.</p> <p>The WWTP staff also operates and maintains an Effluent Reuse Facility (ERF). Treated effluent is diverted to the ERF and is further treated to high quality water that is pumped to an ethanol plant in Casselton. The technology used to achieve this high quality includes microfiltration and reverse osmosis. In 2014 the WWTP ERF produced over 324 million gallons of reclaimed water. In June 2015, the ERF had surpassed 2 billion gallons produced and sold since 2009.</p>	<p>The WWTP has recently updated the 2010 Facility Plan to reflect significant changes that have occurred since the original document was submitted in October 2010.</p> <p>The Facility Plan recommendations were prioritized in a phased approach based on the most immediate needs. Phase I recommendations include equipment upgrades to existing components due to age, condition, capacity and safety. These improvements are the most critical from a vulnerability standpoint to adequately and safely treat wastewater. The Phase I improvements were recently bid and awarded in 2015, with expected completion in 2017.</p> <p>Nutrient reduction recommendations for both the existing WWTP and proposed future plant expansion are addressed in the new document. Potential impacts of becoming a larger regional facility (potential service to West Fargo, Horace & Mapleton) were also included.</p> <p>The updated facility plan included applicable technologies and costs to address nutrients in the WWTP effluent, and will provide staff a single document for Commissioners and Funding Agencies to illustrate that the Fargo Wastewater Utility is well prepared if additional effluent limits are implemented in the future.</p> <p>The plan also included analysis for plant expansion, an opinion of cost with an implementation schedule. The improvements will be ranked in order of importance to ensure efficient, reliable and trouble free operation of the WWTP well into the future. Some of the new technologies being considered include (but not limited to):</p> <ul style="list-style-type: none"> • Integrated Fixed Film Activated Sludge (IFAS) • Moving Bed Biofilm Reactor (MBBR) • Membrane Bioreactor (MBR) <p>The WWTP historically has operated 24/7 with a minimum of one operator on duty at all times. In January 2015, the WWTP began to automate the processes so as not to have staff 24/7. Currently a call-out alarm system has successfully been implemented along with the installation of a security gate. These changes have allowed the plant to reduce staffing to 20 hours per day. The goal is to reduce staffing even further in the near future.</p>

Description of Service Provided	Current or Emerging Issues
Southeast Cass Sewer provides wastewater collection services to rural Cass County. Pursuant to an agreement, maintenance and monitoring of their infrastructure is provided by the City of Fargo.	<p>The number of service connections decreases as additional land is annexed by the City of Fargo and services are converted to urban standards.</p> <p>Southeast Cass Sewer provides budgetary resources needed to pay for their share of maintenance costs provided by the City.</p>

Description of Service Provided	Current or Emerging Issues
<p>The Storm Sewer Utility collects, routes and discharges precipitation back into the river throughout the City. To achieve this, a complex series of conveyances including natural features, legal drains, inlets, underground pipes, lift stations and retention ponds are used.</p> <p>The major services delivered include:</p> <ul style="list-style-type: none"> • Site plan reviews • Pre and post construction determinations & verifications of building elevations • Issuance of Elevation Certificates • Establishment of required minimum build elevations for developers • Oversee status of map changes through Flood Insurance Studies and Letters of Map Revisions & Amendments • Regulate and enforce restrictions on use of floodway and river setback ordinance • Review plans for non-structural development in the floodplain and issue Development Permits for construction activities in the floodplain and river set-back areas. • Respond to citizen complaints regarding use of floodway, development of floodplain and/or disturbance within the river setbacks. • Administer the Community Rating System (CRS) program by documenting actions being done to manage floodplain, developing new ways to educate public, and new ways to pro-actively manage the floodplain. The City receives a discount for its citizens required to carry flood insurance by participating in this program. The responsibility for this program is a function of floodplain management. • Develop concepts for long term handling of storm water in areas of growth. • Size trunk line infrastructure appropriately to handle future contributing drainage areas. • Keep record of existing lift stations and the equipment, design capacities and operational features that are unique to each station. (Storm Sewer Lift Station Operations and Maintenance Manual) • Develop concepts to relieve stress from existing, aging drain systems that are at or approaching capacity on a regular basis with current development. 	<ul style="list-style-type: none"> • The site plan submittals are at a very high level and are requiring significant staff time to review. • The current floodproofing construction policy requires any residential structure within the 41' inundation area to be constructed with a floodproof basement. This requires more staff time to establish minimum build elevations, survey time to set those elevations, collect post elevations and issue Elevation Certificates. • This past January, the City adopted the Flood Insurance Study created by FEMA. This is requiring additional staff time to answer many questions from our residents. • New Letter of Map Changes are at all time high levels with the new residential developments being constructed and after the adoption of the new 1% annual chance floodplain. • The expansion of the floodplain results in an increase of development permits to be issued for activities in the floodplain as well as addressing any disturbances within the setback areas. • In 2015, we are scheduled to go through a CRS audit. At this audit we will need to provide documentation to maintain our Class 7 rating. The goal of the audit is to gain more points to get closer to a Class 6 rating and also determine areas where additional points could be gained to try and achieve the Class 6 rating. • Due to the rapid growth south of current edges of the City we are currently in the final process of completing a master planning study for future storm trunk lines, storm sewer lift stations and flood protection options. This master planning will be very beneficial in the future planning of new developments in the southwest quadrant of the City. • With the recent new development, we have constructed and are in the process of constructing additional lift stations to handle the new infrastructure within these new additions. The additional lift stations will require additional work for scheduled maintenance and up keep, while there is an increasing need for repairs/replacement to existing lift stations that are reaching the end of their useful life. • Current rate structure of the Storm Sewer Utility is out of date and needs updating. Funds generated from the current rate are insufficient for being able to complete required maintenance to the storm sewer system.

<ul style="list-style-type: none"> • Provide for scheduled maintenance and upkeep of lift stations. • Review and track private connections to the storm sewer system. • Maintain Storm Sewer Design Manual and Standards. • Address ongoing concerns of the public related to individual local drainage systems and how they function. • Creating projects for maintenance to City's storm sewer system. • Manage a list of properties affected by flooding. List information on elevation and river gage levels that affect the homes. • Proactively seek to increase the level of protection and affected residents through the Flood Protection and Incentive Program (FPIP) in areas that are not identified as areas of need for projects under the City-wide comprehensive plan. City provides a cost share for properties increasing their level of protection through elevation of rear yards or floodwalls. • Identify areas of greatest risk and work to develop concepts and ultimately construction projects to reduce and/or eliminate risks associated with riverine flooding or flooding from intense storms. This typically requires the City to leverage partnerships with FEMA, USACE, NDSWC, SE Cass WRD, Cass County and other agencies. • National Pollutant Discharge Elimination System (NPDES) • Administer and update City of Fargo Storm Water Pollution Prevention Program addressing six minimum control measures mandated by NDDOH and Federal EPA under our MS4 permit with the State. 	<ul style="list-style-type: none"> • With the success of the voluntary buyout program this list is every changing. This list will continue to be updated as needed so that the City's emergency efforts during a possible flood fight are readily available. • The implementation of the City-wide comprehensive plan is continuing. This year we have numerous projects under construction as well as continuing to design numerous projects with a goal of completing enough projects to start some property removals from the Special Flood Hazard Area by 2018. • Future considerations with the implementation of the flood protection measures will be the long term annual inspections and operations and maintenance of the levees. Both items will require additional staff time and cost. • In 2015 NDDOH issued a new NPDES permit that change the construction BMP requirements, which our staff is making sure the contractors stay into compliance with. NDDOH will be issuing a new MS4 permit soon too, which will require City policies to be updated.

Description of Service Provided	Current or Emerging Issues
<p>The City of Fargo Vector Control program focuses on the widespread prevention of mosquitoes. Through aggressive adulticide management along with the use of both truck and aerial ULV applications the Vector Control program has been successful in providing the residents of Fargo relief from the pesky bite of our northern mosquito.</p> <p>Integrated mosquito management methods employed by the city's Vector Control program have been specifically tailored to safely counteract each stage of the mosquito life cycle. Larval control through water management and source reduction is a prudent pest management alternative as is the use of the environmentally friendly EPA-registered larvicides.</p> <p>Without the Vector Control program within the City of Fargo we would see:</p> <ul style="list-style-type: none"> • Parents having to console their child as they attempt to fall asleep with 30 fresh mosquito bites from playing in the backyard for 15 minutes earlier in the evening. • Residents having to stay indoors on glorious, warm, balmy evenings; constantly lathering up with sticky repellents; or wearing long-sleeves and long pants during hot weather. 	<ul style="list-style-type: none"> • Through the expansion of neighborhood developments along with the growth of the city's extraterritorial limits the Vector Control program will need increase efforts on standing water pretreatments. • The infectious West Nile Virus is a growing concern as nationwide human infections are on the rise. • With more conscious mosquito efforts taking place by other communities, resources needed for aerial applications have become more difficult to schedule on a moment's notice.

Description of Service Provided	Current or Emerging Issues
<p>The Division of Solid Waste is responsible for managing and directing all aspects of waste collection, disposal, and materials recycling which occurs in the City of Fargo (public and private).</p> <p>Specifically, the Division provides solid waste services in the following areas:</p> <ul style="list-style-type: none"> • Administration • Residential Collection • Commercial Collection • Roll-off Collection • Municipal Solid Waste (MSW) Landfill – to include Renewable Energies • Recycling • Household Hazardous Waste 	<ul style="list-style-type: none"> • Re-route Residential Collection - accommodate significant residential growth south of 52nd avenue area. • Facility plan development – A review of all current Solid Waste operations and a thorough evaluation of options available to the City to address both short and long-term disposal needs. • Reclamation and reuse of the former landfill – located on 150-acres directly east of the current landfill, utilized from 1950-1980. Reclamation would involve removal of the existing waste and placement in a newly constructed cell at the site. The intent would be for additional future landfill capacity and elimination of potential environmental liability due to off-site migration of contaminants. • Renewable Energy Expansion – Expand the landfill gas collection system in filled areas of the current landfill. Convert the landfill gas to natural gas quality for a product that will require less maintenance on the LFG electric generator.

Description of Service Provided	Current or Emerging Issues
<p>The Forestry Division works aggressively to promote and maintain a safe, healthy, and continuously progressive urban forest for the benefit of all residents.</p> <ul style="list-style-type: none"> • Street tree pruning and maintenance • Insect and disease management • Planting: in-house and contracted • Residential Planting Assistance Program • Removals and diversification • Public education, workshops, & presentations • Volunteer coordination for forestry projects • Annual risk assessment • Respond to residential tree health requests • Planting beds and small tree maintenance • Residential Brush Chipping Program • Annual Arbor Day celebration 	<ul style="list-style-type: none"> • Preparation efforts for the arrival of Emerald Ash Borer continues. This includes aggressive diversification, in-fill of vacant street tree locations, contractor agreements, public education opportunities, and partnerships with the ND Dept. of Agriculture and the ND Forest Service. Currently there are approximately 16,000 ash street trees that make up about 30% of the entire population. • In 2014, Dutch Elm Disease caused the removal of 587 elm trees. It is anticipated that 2015 will be approximately the same. • Land Development Code requires that street trees be planted. Enforcement efforts are on-going in new residential areas. • Median and enhanced landscaping requests are becoming increasingly common from developers and planning. Additional funds for either in-house or contracted staff will be necessary to keep up with required maintenance of these areas. Examples include 45th St S, 52nd Ave S, South University Dr, and Veterans Boulevard.

Description of Service Provided	Current or Emerging Issues
<p>The Municipal Airport Authority is a five-member board that was established to oversee airport activities and implementation of the airport master plan, and has since invested time and money into improvements to provide a safe and efficient airport.</p> <p>The Municipal Airport Authority normally meets the 2nd and 4th Tuesday of each month in the boardroom at the terminal building.</p> <p>Fargo's Hector International Airport provides the following services:</p> <ul style="list-style-type: none"> • Commercial air service to 11 markets, corporate, general and military aviation • 24/7 FAA Air Traffic Control Tower; US Customs & Border Protection clearance; Foreign Trade Zone #267 • Fixed Base Operator Services for charter, aircraft fuel and maintenance • Long term auto parking and car rental services 	<ul style="list-style-type: none"> • There are ongoing issues regarding the timely availability of Federal funding via the Airport Improvement Program. These funds are used to pay for eligible airport improvement projects. • Mergers in the airline industry have resulted in fewer airline options to provide service. • The industry is experiencing a pilot shortage that will have a significant impact on service to small communities unless the federal government reverses recent changes to pilot qualification requirements. • There is a need to increase State funding for North Dakota airports during the next biennium. Progress was made during the last session. • The Airport Authority is in the process of updating the Airport Master Plan and Airport Layout Plan.

Description of Service Provided	Current or Emerging Issues
<p>The FARGODOME is a City-owned 19,000 seat indoor entertainment arena. The venue is governed by the seven member Fargo Dome Authority (FDA) who are appointed by the Fargo City Commission from nominations from the City of Fargo (2), NDSU (2), the Fargo Park Board (1), the Fargo School Board (1), and the Cass County Commission (1). The FDA contracts with Spectra by Comcast Spectator to manage the FARGODOME.</p> <p>The FARGODOME is a multi-purpose facility. Events generally fall into one of the following categories:</p> <ul style="list-style-type: none"> • Concerts • NDSU Football • Family Shows • Theatre Shows • Trade Shows • Festivals • Amateur Sports • Convention/Miscellaneous • Professional Sports • Motorsports • Meeting Rooms 	<ul style="list-style-type: none"> • Management and the FDA strive to keep the FARGODOME efficient, modern and relevant through annual capital upgrades funded by the FARGODOME's escrow account. • Throughout its 20+ year history, the FARGODOME facility, our staff, and the community have developed a strong reputation within the concert industry. Promoters know that the building will accommodate their exact specifications, staff will be attentive to their show and patron needs, and the region will purchase tickets. That said, entertainment venues are at the mercy of the often cyclical concert touring business: which artists are touring, what genres are being represented, how does the geographical routing line-up, etc. • The FARGODOME maintains a solid line-up of recurring events, including primary tenant national champion NDSU football, trade shows, our Gate City Bank Broadway series, Happy Harry's Ribfest, motorsports, and amateur sporting events. • Since we rely on 400+ part-time employees, we are challenged to attract and retain part-time staff in Fargo's low unemployment environment.

Fund Description	Fiscal Trends and Comments
<p>A defined benefit pension option is offered to all full-time employees of the City.</p> <p>Currently, the City administers two plans and has employee membership in two other plans that are maintained by other agencies.</p> <p>The pension plans includes:</p> <p>City Employee Police Fire Relief Association North Dakota Public Employee Retirement System</p> <p>The Board of City Commissioners have administrative control over the City Employee and Police pension systems, while the Fire Relief and the NDPERS is maintained by other governmental bodies.</p> <p>Operational oversight for City-administered plans is done by a Pension Board.</p> <p>In addition to defined benefit pension plans, voluntary employee elective contributions can be made to Section 457 deferred compensation plans. These plans allow employees to save for retirement on a pre-tax basis.</p>	<ul style="list-style-type: none"> • A defined benefit pension funding policy was adopted in 2012 that increased employee and employer contributions to sustainable levels with the goal of fully funding the actuarial determined contribution (ADC) by FY 2018. • Investment returns on plan assets have improved significantly since 2008. • Funding levels are rising as a result of an improved funding policy and positive investment results. • The City Employee and Police Pension plans are pursuing the goal of fully funding the actuarially determined contribution (ADC). Collectively, the plans are currently funding 98.5% of the ADC. • A multi-year amortization period will be needed to maintain a 100% funded status with current contribution levels for all plans that are offered to employees. • Governmental Accounting Standards Board Statements No. 67 and 68 will be implemented in 2016 as required. This will increase the financial transparency for pension fund assets and liabilities.
