Conducted Energy Device

304.1 PURPOSE AND SCOPE

This policy provides guidelines for the issuance and use of the conducted energy device (CED).

304.2 POLICY

The CED is used in an attempt to control a violent or potentially violent individual. The appropriate use of such a device may result in fewer serious injuries to officers and suspects.

304.3 ISSUANCE AND CARRYING CEDS

Only members who have successfully completed department-approved training may be issued and may carry the CED.

The Quartermaster should keep a log of issued CED devices and the serial numbers of cartridges/magazines issued to members.

CEDs are issued for use during a member's current assignment. Those leaving a particular assignment may be required to return the device to the department inventory.

Officers shall only use the CED and cartridges/magazines that have been issued by the Department. Cartridges/magazines should not be used after the manufacturer's expiration date.

Uniformed officers who have been issued the CED shall wear the device in an approved holster.

Officers who carry the CED while in uniform shall carry it in a holster on the side opposite the duty weapon.

(a) All CEDs shall be clearly distinguishable to differentiate them from the duty weapon and any other device.

(b) For single-shot devices, whenever practicable, officers should carry an additional cartridge on their person when carrying the CED.

(c) Officers should not hold a firearm and the CED at the same time.

Non-uniformed officers may secure the CED in a concealed, secure location in the driver's compartment of their vehicles.

304.3.1 USER RESPONSIBILITIES

Officers shall be responsible for ensuring that the issued CED is properly maintained and in good working order. This includes a function test and battery life monitoring, as required by the manufacturer, and should be completed prior to the beginning of the officer's shift.

The function test shall be conducted in a manner consistent with department-approved training.

The function test shall be completed by members in the following order:

(a) Draw the CED and point it in a clearing barrel.

(b) Depress both sides of the "ARC" switch at the same time, which will illuminate the CID.

Copyright Lexipol, LLC 2024/09/04, All Rights Reserved.
Published with permission by Fargo Police Department

(c) Flip the safety switch to the "ARMED" position. The CID will illuminate in yellow.

(d) Depress the "ARC" switch on either side resulting in a five second cycle.

(e) Flip the safety switch to "SAFE" position. The CED is now ready for field use.

Members shall ensure their CED battery is placed in the charging dock at least once every 30 days to allow for data upload and to maintain full charge.

CEDs that are damaged or inoperative, or cartridges/magazines that are expired or damaged, shall be returned to the Training Sergeant for disposition. Officers shall submit documentation stating the reason for the return and how the CED or cartridge/magazine was damaged or became inoperative, if known.

304.4 VERBAL AND VISUAL WARNINGS

A verbal warning of the intended use of the CED should precede its application, unless it would otherwise endanger the safety of officers or when it is not practicable due to the circumstances. The purpose of the warning is to:

(a) Provide the individual with a reasonable opportunity to voluntarily comply.

(b) Provide other officers and individuals with a warning that the CED may be deployed.

If, after a verbal warning, an individual fails to voluntarily comply with an officer's lawful orders and it appears both reasonable and feasible under the circumstances, the officer may, but is not required to, activate any warning on the device, which may include display of the electrical arc, an audible warning, or the laser in a further attempt to gain compliance prior to the application of the CED. The laser should not be intentionally directed into anyone's eyes.

The fact that a verbal or other warning was given or the reasons it was not given shall be documented by the officer deploying the CED in the related report.

304.5 USE OF THE CED

The CED has limitations and restrictions requiring consideration before its use. The CED should only be used when its operator can safely deploy the device within its operational range. Although the CED may be effective in controlling most individuals, officers should be aware that the device may not achieve the intended results and be prepared with other options.

If sufficient personnel are available and can be safely assigned, an officer designated as lethal cover for any officer deploying a CED may be considered for officer safety.

304.5.1 APPLICATION OF THE CED

The CED may be used when the circumstances reasonably perceived by the officer at the time indicate that such application reasonably appears necessary to control a person who:

(a) Is violent or is physically resisting.

(b) Has demonstrated, by words or action, an intention to be violent or to physically resist, and reasonably appears to present the potential to harm officers, themself, or others.

Copyright Lexipol, LLC 2024/09/04, All Rights Reserved.
Published with permission by Fargo Police Department

Mere flight from a pursuing officer, without additional circumstances or factors, is not good cause for the use of the CED to apprehend an individual.

The CED shall not be used to psychologically torment, to elicit statements, or to punish any individual.

304.5.2 SPECIAL DEPLOYMENT CONSIDERATIONS

The use of the CED on certain individuals should generally be avoided unless the totality of the circumstances indicates that other available options reasonably appear ineffective or would present a greater danger to the officer, the subject, or others, and the officer reasonably believes that the need to control the individual outweighs the potential risk of using the device. This includes:

(a) Individuals who are known to be pregnant.

(b) Elderly individuals or obvious juveniles.

(c) Individuals with obviously low body mass.

(d) Individuals who are handcuffed or otherwise restrained.

(e) Individuals known to have been recently sprayed with a flammable chemical agent or who are otherwise known to be in close proximity to any known combustible vapor or flammable material, including alcohol-based oleoresin capsicum (OC) spray.

(f) Individuals whose position or activity is likely to result in collateral injury (e.g., falls from height, located in water, operating vehicles).

Any CED capable of being applied in the drive-stun mode (i.e., direct contact without probes as a primary form of pain compliance) should be limited to supplementing the probe-mode to complete the circuit, or as a distraction technique to gain separation between officers and the subject, thereby giving officers time and distance to consider other force options or actions.

304.5.3 TARGETING CONSIDERATIONS

Recognizing that the dynamics of a situation and movement of the subject may affect target placement of probes, when practicable, officers should attempt to target the back, lower center mass, and upper legs of the subject, and avoid intentionally targeting the head, neck, area of the heart, or genitals. If circumstances result in one or more probes inadvertently striking an area outside of the preferred target zones, the individual should be closely monitored until examined by paramedics or other medical personnel.

304.5.4 MULTIPLE APPLICATIONS OF THE CED

Once an officer has successfully deployed two probes on the subject, the officer should continually assess the subject to determine if additional probe deployments or cycles reasonably appear necessary. Additional factors officers may consider include but are not limited to:

(a) Whether it is reasonable to believe that the need to control the individual outweighs the potentially increased risk posed by multiple applications.

(b) Whether the probes are making proper contact.

Copyright Lexipol, LLC 2024/09/04, All Rights Reserved.
Published with permission by Fargo Police Department

(c) Whether the individual has the ability and has been given a reasonable opportunity to comply.

(d) Whether verbal commands or other options or tactics may be more effective.

304.5.5 ACTIONS FOLLOWING DEPLOYMENTS

Officers should take appropriate actions to control and restrain the individual as soon as reasonably practicable to minimize the need for longer or multiple exposures to the CED. As soon as practicable, officers shall notify a supervisor any time the CED has been discharged. If needed for evidentiary purposes, the expended cartridge, along with any probes and wire, should be submitted into evidence (including confetti tags, when equipped on the device). The evidence packaging should be marked "Biohazard" if the probes penetrated the subject's skin.

304.5.6 DANGEROUS ANIMALS

The CED may be deployed against an animal if the animal reasonably appears to pose an imminent threat to human safety.

304.5.7 OFF-DUTY CONSIDERATIONS

Officers are not authorized to carry department CEDs while off-duty.

Officers shall ensure that CEDs are secured while in their homes, vehicles, or any other area under their control, in a manner that will keep the device inaccessible to others.

304.6 DOCUMENTATION

Officers shall document all CED discharges in the related arrest/crime reports and the CED report forms. Photographs should be taken of any obvious probe impact or drive-stun application sites and attached to the CED report form. Notification shall also be made to a supervisor in compliance with the Use of Force Policy.

Unintentional discharges shall cause the Shift Commander to file a personnel complaint in conformity with the Personnel Complaints policy.

Pointing the device at a person, audible warning, laser activation, and/or arcing the device, other than for testing purposes, shall be documented in the case report and reviewed by the Shift Commander, who shall file a personnel complaint if deemed to be outside of department policy. Data downloads from the CED after use on a subject should be done as soon as practicable using a department-approved process to preserve the data.

304.6.1 CED DATA REPORT

As applicable based on the device type, items that shall be included in the CED data download are:

(a) The brand, model, and serial number of the CED and any cartridge/magazine.

(b) Date, time, and location of the incident.

(c) Whether any warning, display, laser, or arc deterred a subject and gained compliance.

Copyright Lexipol, LLC 2024/09/04, All Rights Reserved.
Published with permission by Fargo Police Department

(d) The number of probes deployed, CED activations, the duration of each cycle, the duration between activations, and (as best as can be determined) the duration that the subject received applications.

(e) The range at which the CED was used.

(f) The type of mode used (e.g., probe deployment, drive-stun).

(g) Location of any probe impact.

(h) Location of contact in drive-stun mode.

(i) Description of where missed probes went.

(j) Whether medical care was provided to the subject.

(k) Whether the subject sustained any injuries.

(l) Whether any officers sustained any injuries.

The CED data download should be attached to the use of force report.

The Professional Accountability Unit (PAU) Lieutenant should perform quarterly audits in the database to ensure the number of CED cartridge deployments corresponds to the number of reported CED deployments. CED information and statistics, with identifying information removed, should periodically be made available to the public. CED usage shall also be included in quarterly use of force reporting conducted by the Professional Standards Division (PSD) commander.

304.6.2 REPORTS

The officer should include the following in the arrest/crime report:

(a) Identification of all personnel firing CEDs

(b) Identification of all witnesses

(c) Medical care provided to the subject

(d) Observations of the subject's physical and physiological actions

(e) Any known or suspected drug use, intoxication, or other medical problems

304.7 SUPERVISOR RESPONSIBILITIES

When possible, supervisors should respond to calls when they reasonably believe there is a likelihood the CED may be used. A supervisor should respond to all incidents where the CED was activated.

A supervisor should review each incident where a CED has been used on a person. The device's internal logs should be attached to the use of force report in the approved electronic database. The supervisor should arrange for photographs of probe sites to be taken and witnesses to be interviewed.

304.8 TRAINING

Personnel who are authorized to carry the CED shall be permitted to do so only after successfully completing the initial department-approved training. Any personnel who have not carried the

Published with permission by Fargo Police Department

CED as a part of their assignments for a period of six months or more shall be recertified by a qualified CED instructor prior to again carrying or using the device.

Proficiency training for personnel who have been issued CEDs should occur every year. A reassessment of an officer's knowledge and/or practical skills may be required at any time, if deemed appropriate, by the Administrative Lieutenant. All training and proficiency for CEDs will be documented in the officer's training files.

Command staff, supervisors, and investigators should receive CED training as appropriate for the investigations they conduct and review.

Officers who do not carry CEDs should receive training that is sufficient to familiarize them with the device and with working with officers who use the device.

The TDU Lieutenant is responsible for ensuring that all members who carry CEDs have received initial and annual proficiency training. Periodic audits should be used for verification.

Application of CEDs during training could result in injuries and should not be mandatory for certification.

The TDU Lieutenant should include the following training:

(a) A review of this policy.

(b) A review of the Use of Force Policy.

(c) Performing weak-hand draws or cross-draws until proficient to reduce the possibility of unintentionally drawing and firing a firearm.

(d) Target area considerations, to include techniques or options to reduce the unintentional application of probes to the head, neck, area of the heart, and groin.

(e) Scenario-based training, including virtual reality training when available.

(f) Handcuffing a subject during the application of the CED and transitioning to other force options.

(g) De-escalation techniques.

(h) Restraint techniques that do not impair respiration following the application of the CED.

(i) Proper use of cover and concealment during deployment of the CED for purposes of officer safety.

(j) Proper tactics and techniques related to multiple applications of CEDs.

The TDU Lieutenant should analyze the CED usage data when preparing the annual training plan to identify trends, including deterrence and effectiveness.
