Payment in Lieu of Taxes Policy to Encourage New Housing in the University Mixed Zoning District Adopted:

The Board received a communication from Planning Director Jim Gilmour stating the Planning Department has been working with the Tax Exempt Review Committee on a new policy to allow the use of a Payment in Lieu of Taxes (PILOT) program to encourage redevelopment in the University Mixed Use Zoning District near NDSU. He said the new policy would provide property tax incentives to new housing developments for up to a ten year period. This policy is similar to what has been provided downtown, he said, and would make more areas eligible for assistance because the program would not be limited to blighted areas.

In response to a question from Commissioner Williams about whether or not there are income levels that the properties will be sold or rented to, Mr. Gilmour stated there are no income requirements directly stated in the policy for this program. Mr. Gilmour stated business plans would be looked at to determine if the plan is to rent to students and if so they would likely be eligible for the incentive.

Commissioner Williams said his only concern with the policy is that the intent of the PILOT program for workforce style housing doesn't seem to be addressed. He said the policy needs to speak for itself and be clear.

Commissioner Williams moved the policy for Payment in Lieu of Taxes in the University Mixed Zoning District be adopted contingent upon eligibility of policy being clearly defined and brought back to the City Commission for final approval.
