Crafternoons is Expanding!

Our Popular Afterschool Program is Expanding to Northport!

Since its launch in 2016, Crafternoons at Carlson has become one of the Fargo Public Library’s signature events. **This fall we are excited to announce the expansion of Crafternoons to our Northport branch. Beginning Tuesday, Sept. 25, children 12 and younger can also stop by the Northport branch for an afternoon of creative inspiration.** Crafternoons follows an open house format where children and their families are welcome any time between 3 and 4:30 p.m. to make a craft with a group of their peers. The library strives to provide interesting projects that encourage creativity, discussion, and quality time between children and adults. Whether you come to Carlson or Northport, our goal for Crafternoons is to make a fun, welcoming space for everyone.

We endeavor to create an environment at Crafternoons that fosters a child’s imagination and inventiveness; where children take ordinary objects and turn them into pieces of art. A selection of this season’s projects include sleepy unicorn ceramic pots, felt turkey pinecones, and mini yarn hat ornaments. Each week features a different craft and all materials are provided.

For more information about Crafternoons or any of the activities described in **The Children’s Chapter**, please contact the Fargo Public Library’s Children’s Services Staff at 701-241-1495 or email us at kids@fargolibrary.org. You can also find us on the web at www.fargolibrary.org/kids. Remember, all Fargo Public Library events are FREE and open to the public.

Thank you to the Friends of the Fargo Public Library for their generous support of the Crafternoons program!

Sunspotter Telescopes Are Available for Check-Out

Though NASA's Parker Solar Probe launched this fall, you can safely take a look at the Sun right now with the Fargo Public Library's Sunspotter Solar Telescopes. The Fargo Public Library was generously gifted three telescopes from the MSUM Dept. of Physics and Astronomy through a grant from the American Astronomical Society. The Sunspotter is a Keplerian telescope that projects an image of the sun through a series of mirrors onto a white surface providing observers with a safe way to view sunspots, solar eclipses, and other solar activity. It's easy to set up and allows for group viewing. A copy of *Solar Science: Exploring Sunspots, Seasons, Eclipses, and More* by Dennis Schatz and Andrew Fraknoi is included with each telescope kit, providing a great starting point for instruction on the Sun. Telescopes check out for three weeks and are available at each Fargo Public Library location. Checkout is limited to one per card.

1,000 Books Before Kindergarten

Designed to encourage reading and sharing stories, the 1,000 Books Before Kindergarten program highlights the benefits of reading to babies, toddlers, and preschoolers. Children who have been read to from a young age begin school with the tools they need for academic success. It is our goal to help prepare all children in the Fargo community to become lifelong readers.

Participation in the 1,000 Books Before Kindergarten program is easy. Read a book, any book to your child, with the goal of reading 1,000 before kindergarten. By reading just one book a night, families can reach the 1,000-book goal in three years and provide their children essential early literacy skills. Research shows that the most reliable predictor of school success is being read to during early childhood. Reading to children from an early age can help prepare children to enter Kindergarten with the skills they need to succeed. Most importantly, sharing books with children promotes a lifelong love of books and reading.

To get started with the 1,000 Books Before Kindergarten program, stop by any Fargo Public Library location and pick up a tracking log. Once completed, bring back the tracking log and receive a FREE book!

For more information, please contact the Children's Services department at 701-241-1495 or visit us at www.fargolibrary.org/kids.
