

Electronic Nicotine Delivery Devices

A generational look at the evolution of electronic nicotine delivery devices.

CIG-A-LIKES

Cig-a-likes first entered the market in 2007. These products mimic the size and shape of a tobacco cigarette and the nicotine solution is sold in pre-filled cartridges. Very often they are also disposable.

E-LIQUID

E-liquid is the flavored liquid that is used in e-cigarettes. Sometimes referred to as e-juice or vape juice, e-liquid is often available in a range of nicotine strengths and flavors.

VAPE PENS

Vape pens are larger than cig-a-likes and often have the appearance of an ink pen. These devices reach higher temperatures, can have batteries or be rechargeable, and have a refillable cartridge that the user fills with a nicotine or THC solution.

MODS & TANKS

Mods and tanks are the largest devices. They have a big battery to create more aerosol which allows the user to inhale greater amounts of nicotine and chemicals at a faster rate. The devices have a refillable tank for a nicotine solution.

POD SYSTEMS

Pod-based systems are typically smaller and can often look like a USB. Pods consist of two parts: a battery and a pod filled with a nicotine solution that connects to it. The pods can be refillable or purchased pre-filled.

DISPOSABLE DEVICES

Disposable vaping devices are designed for single use. Devices come fully charged and pre-filled with nicotine solutions. When e-juice is gone, the device can be thrown away.

Puff Bar, Wave Bar, STIG
270-400 puffs

Puff Plus
800 puffs

Puff Flow
1000 puffs

Fume
1500 puffs

Flum
3000 puffs
