The police department put out the speed wagon for a couple of weeks. The engineering department set out radar counters and found an average speed of 25 m.p.h. with an 85% speed of 29 m.p.h. Jeremy Gorden will communicate with the resident who brought forward the speeding concern of the findings.

3. New Members and Meeting Schedule

Currently the police department handles special events. It has been decided that TTAC should take over this responsibility and add another member from Public Health. Currently the police department has a special event permit that is supposed to be submitted 45 days prior to the event. The district officer reviews and issues the permit. A revised permit is in the works to help clear up common problems and questions. The police department will still handle block party requests which they can receive up to 70 requests a year. A subcommittee will be created with the City Attorney to outline and develop a new policy. Until a new policy is developed the current process will stay the same.
