The overall character of the work should align with the following considerations:

1. **Aesthetic Quality**: Objective, based solely on personal taste and the emotional response one has from observing the artwork. Aesthetic quality is often determined by conducting an *aesthetic evaluation* of the object and observing the structural qualities: tone, shape, color, line, form, and texture.

2. **Quality and Elements of Design**: The artwork must complement, enhance or modify a public space. Look for style, scale, material, form, durability and safety, as well as, the Principles of Art and Design: balance, contrast, emphasis, movement, pattern, rhythm, unity/variety, and space. Additionally, the Artist experience and artisanship can be taken into consideration.

3. **External Factors**: The artwork encourages public participation and functions within the public space. Could the artwork negatively affect the public space? Could the artwork be perceived as offensive, cultural misappropriated, or promote or advertise a particular group, business, organization or political message.

4. **Fabrication**: The artist possesses the ability to meet the specific criteria established in the RFP. Failure to produce the approved artwork established in the RFP will lead to the artist forfeiting the monies allotted for the commissioned work.

5. **Cultural Geography**: If relevant, does the Artwork take into account the cultural values, history, traditions, diversities, and identities of the region. Does the Artwork contribute to building a sense of place within the cultural landscape of the City of Fargo?

6. **Public Art Master Plan**: The work aligns with ideas and themes outlined within the Fargo Public Art Master Plan.

7. **Content**: The message the Artwork is conveying is clear and appropriate for public display and does not contain advertisement for any commercial, political, or other established organizations.

8. **Public Liability**: Artworks that have the potential to create a public safety issue or hold the City of Fargo liable should be excluded until the artist can resolve the issue.

9. **Maintenance**: Consideration given to structural and surface integrity, permanence and protection of the artwork against theft, vandalism, weathering, and excessive maintenance and repair costs. Attention paid to the materials used for public art intended for outdoor placement and the maintenance costs over the lifespan of the artwork.
